Water Damage Restoration Experts

Serving The Great State Of Wisconsin

Water Damage Restoration Service Provider In Madison WI Launches Milwaukee Service

September 24, 2018

September 24, 2018 - PRESSADVANTAGE -

Home Service Fix, a provider of water damage restoration services in Madison, WI, is proud to announce that they have launched their new service for restoration of flood and water damaged homes and buildings in the Milwaukee area.

To make the launch of their second location more memorable, Home Service Fix will be providing free gifts for the first two weeks starting on October 1, 2018 with every quote.

Barbara Horton, manager at Home Service Fix, says: "We wanted to be novel with the launch of our new flood restoration and water damaged repair service because we wanted to put ourselves on the map in the Milwaukee area. It should be really worthwhile and we're hoping it raises awareness of our business and gives customers a great new service at the same time."

Barbara points out that they have always endeavored to stand out from the other water damage restoration service companies and the launch celebration is one way to achieve this. She says, "We may not be the only business with this kind of offering, but local residents are choosing us because we offer a great service at a

great price in a timely manner at a time when they need us most.?

Barbara explains, "Storms, fires, and floods are all major disaster events that can cause a lot of harm to your home, and with this our disaster restoration team has the experience and equipment. We'll make sure that any destruction issues are looked after right away."

Barbara adds, "Water damage is one of the most destructive things that can happen to a home or business. A fast response to begin the drying process is critical to avoid further damage, such as mold and bacteria. Our team of certified water damage restoration and home flooding specialists ensures this process is initiated as quickly as possible to help you get your home or business back to pre-loss condition."

The restoration techniques provided by the team of experts from Home Service Fix Milwaukee will be able to handle all aspects and areas of the renovation requirements such as water damage removal, sewage extraction, mold repairs, mildew removal and property recovery.

Meanwhile, the services provided by Home Service Fix are not just about water damage restoration. They also provide sewage removal, fire damage restoration, and mildew and mold removal services.

Because of pressure buildup in the sewer system of the city, water can rise up and get into the home through the toilet or other plumbing. This is dangerous to the health of the family because sewage carries a lot of excrement and filth. Thus, Home Service Fix has a crew of sewage backup cleanup professionals. They have the necessary hazmat suits that allow them to take care of the problem professionally and properly.

For those cases where the home or business is damaged by fire, Home Service Fix has a team of fire repair technicians who are able to remove cigar stains, smoke stains, and replace all of the items damaged by fire. They also have the appropriate advanced equipment for getting rid of all the water and restore the damage caused by the water that was used to put out the fire. The team of fire repair technicians have been given adequate training on how to eliminate all of the ash, smoke and water damage as a result of a fire event. They will even be able to get rid of the unpleasant smells left by a fire and get the home or business smelling fresh again.

One of the dangers of having water inside a home for a long time because of a flood or water leak is the development of mold and mildew. Mold growth inside the home is a health hazard for the residents because the spores released by the mold into the air can cause respiratory problems like asthma and coughing. Mold growth can also hasten the deterioration of wood and other materials in the home. Thus, it is essential to get rid of mold and mildew as soon as possible. Barbara points out that this is the expertise of the mildew and mold removal team from Home Service Fix.

Home Service Fix has been providing water damage restoration services in Madison since 2017. To date, they have already served dozens of customers. Barbara points out that they aim to do the same in the Milwaukee area.

Those who need more information about the services offered by Home Service Fix or who want to book an appointment can visit the company website at milwaukee.homeservicefix.com or their Facebook and Twitter pages.
