The Mabra Law Firm has updated its blog with the latest post explaining reasons for accident victims to get professional legal help instead of attempting a DIY. The blog post explains that a personal injury claim deals with medical expenses, property damage, and other moving parts. The Mabra Law Firm states that insurance companies will never open with their best offers and will try to financially take advantage of accident victims that don?t have a car accident lawyer. The blog post can be read here: https://mabrafirm.com/can-you-settle-a-car-accident-lawsuit-without-a-lawyer.

The blog post emphasizes the need to know about the claims process before getting started with it while cautioning victims against any delays. Ronnie Mabra, the leading personal injury attorney in Atlanta, suggests accident victims should file a claim immediately, saying, ?Your insurance company knows that there is a statute of limitations limiting the amount of time you have to file a lawsuit. If the insurance company starts delaying or denying your claim to try to make you go over that time limit, you should contact an accident attorney as soon as possible.?

The top Atlanta auto accident attorney advises victims to ensure all paperwork is in order before trying to

begin settlement negotiations. The blog post lists some of the important documents for negotiations. This includes copies of medical records, statements from the victim?s employer regarding lost wages, and any information gathered from eyewitnesses. The #1 auto accident attorney firm stresses the importance of including a copy of the official police report and information regarding the relevant insurance policies, cautioning victims against making a recorded statement, especially without a car accident attorney present.

The blog post suggests that victims of accidents should not accept the first offer without consulting an attorney. The top personal injury law firm emphasizes the importance of having an accident lawyer to get the best settlement offer. The Mabra Firm has been representing accident victims for many years. Its team of top Atlanta auto accident attorneys understands the legal jargon well and is well-versed with the local laws. They have the experience to prove negligence in an auto accident of those who breached their duty of care toward fellow drivers.

Ronnie Mabra offers legal assistance to accident victims, saying, ?Insurance companies know how to intimidate injury victims into lowering the amount they have to pay and raise your out-of-pocket expenses. Your insurance company or the insurance company of the at-fault party will try to convince you that you?re actually to blame for the accident or that you can?t prove the full long-term physical and emotional impact of your injury.? The leading personal injury attorney in Atlanta adds that the insurance provider might try to convince the victim into believing that their doctor?s assessment isn?t good enough, adding, ?They?ll try to get you to submit to an examination by one of their approved healthcare professionals to have your medical costs covered.?

Their goal is to tie up the settlement process and pay as less as possible in compensation. Having a personal injury law firm with extensive experience in handling accident claims gives victims a much better chance of receiving the money they deserve. Ronnie Mabra adds, ?The insurance company will know that picking a fight with an experienced, proven personal injury lawyer during the negotiation process will eventually cost more in legal fees than the claim is worth to them.?

The best accident attorney in Atlanta can calculate the full value of the insurance settlement so the accident victim knows what the worth of their claim is. When the accident lawyer accurately assigns a monetary value to the victim?s compensation claim, the latter gets an idea as to what to expect for their damages, which includes the cost of property damages, the total value of medical bills, chiropractic care, required medical devices, accumulated current and future lost wages, and a dollar amount for pain and suffering. This will ensure that the at-fault driver does not get an opportunity to undervalue the victim?s claim.
