According to the latest data from AccuWeather, Doraville, GA, has ?Fair? air quality, which is generally acceptable for most individuals but can cause minor to moderate symptoms over long-term exposure in those who are sensitive to airborne pollutants. AccuWeather places the amount of Fine Particulate Matter in the air in Doraville at 39 units, almost twice the acceptable limit of 20 units. Fine Particulate Matter has a diameter smaller than 2.5 micrometers and, if it enters the bloodstream, can affect the lungs and the heart. Some symptoms include coughing, difficulty breathing, aggravated asthma, or even the development of chronic respiratory disease.

Homeowners in Doraville have to take some precautions to ensure that the pollutants don?t affect their health. One of the items in the house that can trap and hold particulate matter for a long time is the carpet. As

the microscopic pollutants build up within the fibers of the carpet, with time they can become a health hazard for those living on the property. This is compounded if a homeowner has pets as they frequently shed fur that too can get caught up in the upholstery. Moreover, the less-than-ideal air quality also means that the carpets slowly lose their freshness, become grimy to touch, and turn into an eyesore. Regular carpet cleaning can help homeowners keep their abode feeling refreshing and welcoming while also improving their health.

Go Carpet Cleaning has been serving homeowners and businesses in the Atlanta Metro area with services such as carpet cleaning, upholstery cleaning, rug cleaning, air duct cleaning, cleaning traffic patterns, pet stains cleaning, odors cleaning, and commercial services for several years now. The company has a perfect score of 5.0 out of 5.0 on its Google My Business page from over 80 reviews. Readers can find contact information, read reviews, and view updates on their online listing.

The company also makes sure that mold does not take hold of the carpet. They remove all the excess water so that no moisture is left behind when they're done cleaning since too much water left in the carpet can be a spawning ground for germs.

It plans to upload videos of different types including informative content for the customers to learn more about their carpets, how to treat them, and the different locations in Georgia where it provides its top-notch services.
