

Roofing Company In Everett WA Launches New Google My Business Website

November 27, 2018

November 27, 2018 - PRESSADVANTAGE -

Everett Roofing Pros, a roofing company based in Everett, WA, has announced that they have recently launched their new Google My Business (GMB) website. The new website provides information on the services they provide and updates on recent jobs they have been involved in. More information can be gleaned by visiting the new site at <https://everettroofingpros.business.site>.

Randy Battiste from Everett Roofing Pros says, "We are indeed happy to announce that our GMB website is now up and running. Among many things, you can see updates on some of our projects on our new website. For instance, we have posted a photo of our roofing contractor installing new roofing shingles on a home that is 30 years old. If you have any issues with regards to your roof, be sure to give us a call to schedule a free no obligation estimate or if you have any questions."

Everett Roofing Pros provides residential and commercial roofing services to houses and commercial establishments in Everett and surrounding areas. Randy Battiste says, "Do you live in Everett WA and are looking for an affordable professional local roofing company? Everett Roofing Pros is a local roofing contractor that has been helping Everett business owners and commercial businesses for years with all their roofing. We offer competitive and affordable pricing and guarantee all our work. We are a recommended roofer and have many happy clients."

Randy explains that depending on the kind of roof that has been installed, it is expected to have a life span ranging from 15 to 25 years. The life expectancy of a roof depends on a number of factors, such as the weather conditions and the quality of the roofing materials used. Extreme weather conditions can severely reduce the lifespan of the roof and also the ventilation of the attic. For those who need the services of a roofing professional, the Google Maps page of Everett Roofing Pros can be found at <https://goo.gl/maps/HqmnBtWaqsr>. Their business hours are from 9:00 am to 5:00 pm from Mondays to Fridays and 9:00 am to 3:00 pm on Saturdays.

Randy points out that if it has been a few years since a new roof has been installed or repaired, it would be

advisable to consult a professional roofing company to inspect the roof. It is possible that a new roof may be needed or some preventive maintenance work may be required. This could help the homeowner save some money in the long run. For instance, if a leak has developed in the roof, it could cause some serious damage to the home. Because of such a leak, water may find its way inside the home and possibly damage the drywall and some personal properties.

Furthermore, for those who have asbestos in their drywall, repairing the drywall could be very expensive. Since asbestos is too dangerous for people to handle, they will need the help of a professional and this could cost a lot of money. Repairing or installing a new roof could cost much less and even present less danger to the health of the home's residents.

Meanwhile, it would be dangerous for homeowners to do the roof inspection themselves. This is because in order to inspect the roof, they will have to climb up a ladder and possibly need to get on the roof. With a roof that has been neglected for some time and has developed leaks and is probably weak in some areas, standing or walking on the roof can be really dangerous. Furthermore, homeowners would not know what to look for when inspecting the roof.

Roofing professionals know the signs that a roof needs to be repaired or replaced. For instance, Randy points out that if the roof is covered with moss, fungi or algae, it would be a good idea to call a roofing professional to make an inspection. Also, missing, buckled, cracked or curled shingles may indicate that the roof needs to be replaced.

According to Randy, Everett Roofing Pros provides several roofing services for homes and commercial businesses in Everett and in Snohomish County. These include residential roof replacement, installation of new roofs, roof repairs, 24 hour emergency roof repairs, and commercial roofing. Randy says, "Our commercial roofing services is one of the best in the Everett area. We handle all types of commercial roofing for businesses."

Those who need more information about the services provided by Everett Roofing Pros can visit their new website or call them by phone. Updates on projects can also be found on the site, such as <http://bit.ly/2DNh3AL>.
