

EcoElectronix Electric Stapler Helps to Provide a Pain-Free Experience to Those with Carpal Tunnel Syndrome

December 14, 2018

December 14, 2018 - PRESSADVANTAGE -

Traditional, manual staplers can be a real pain and have been known to cause pain in hands and wrists? especially when trying to staple large stacks of paper together. EcoElectronix develops a solution to painful manual staplers by providing an electric stapler on Amazon.com that requires zero hand strain. Carpal tunnel syndrome is medical condition due to compression of the median nerve as it travels through the wrist at the carpal tunnel.

The main symptoms of CTS include numbness, and tingling in the thumb, index finger, middle finger, and the thumb side of the ring fingers. More than 8 million people are affected by carpal tunnel syndrome each year. EcoElectronix premium stapler has been known to help those with carpal tunnel syndrome as stated in their reviews.

EcoElectronix customer Fran states her pain is gone since using the EX-25 heavy duty electric stapler, ?I have carpal tunnel and have to do a lot of stapling. Pain would get worse as the day went on. This mighty stapler will go through anything with ease. I staple way more papers at one time than suggested and it keeps

on ticking. Best investment I ever made. Pain is gone.?

The electric stapler offers two power options, an AC adapter and batteries, this allows the stapler to be used anywhere. EcoElectronix is widely known for their customer service and lifetime warranty, if for any reason there is a problem with the stapler, they will replace it hassle free.

Another EcoElectronix customer purchased the EX-25 for an employee who had recently had surgery. ?I work in a medium-volume pharmacy and my old partner recently got hand surgery due to complications from carpal tunnel. So in my staff's best interest, I decided to go with this stapler due to the fact that it runs on either battery or ac adapter and has significant depth adjustment. Needless to say, all of us were quite sad when our stapler's motor died two months later. However, once I contacted the seller about my issue and in a matter of days (even despite the 4th of July holiday), I received my replacement in no time. Customer service is great and I'm still happy with my purchase!?

An employee from EcoElectronix shares their goal for the future. ?We are truly grateful to all of our customers and we can?t even begin to express how happy we are that the EX-25 electric stapler has helped ease the pain that some of our customers previously experienced with manual staplers. Moving forward we hope to continue helping more people with carpal tunnel syndrome and provide them with a pain-free experience.?

To purchase the EX-25 electric office stapler, shoppers can visit Amazon.com where it is available now with the lifetime warranty included.
