

Palo Alto Tree Leaders

Tree Service Provider is Now Hard at Work in Palo Alto

December 17, 2018

December 17, 2018 - PRESSADVANTAGE -

Some of the things that a person will find everywhere they look in Palo Alto, California are trees. It's important for those who have trees on their property to maintain them properly so they stay healthy and add to the overall beauty of their landscape. That's why tree maintenance services like pruning and trimming are essential to keeping one's trees in tip-top condition. Sadly, many home and business owners put tree care very low on their priority list. A new tree service company that has come into the Palo Alto area would like to help change that. That company is Palo Alto Tree Leaders.

The company was formed with an eye on doing 4 major types of tree services. These include such tree maintenance tasks as tree trimming, tree removal, stump removal, and emergency tree services. All of these services will dramatically impact the tree health and overall looks of one's landscape.

Rose Nash, a spokesperson for Palo Alto Tree Leaders, spoke about how their team of tree experts got together and started the company. She explained, "Our unique team of tree professionals consists of certified arborists, professional tree techs and others with vast knowledge in the tree service industry. Each and every individual that makes up our company brings a unique skill set and perspective to our approach for tree care. The best thing about those who work at Palo Alto Tree Leaders is that we have a shared vision of how we believe the trees in a home or business landscape should be properly maintained."

Ms. Nash was also asked to describe the benefits of each of their tree services in just a few words; she went on to say, "Tree trimming promotes overall tree health and makes those trees look better. Tree removal emphasizes safely taking down nuisance or overgrown trees. Stump removal reclaims the ground area and makes it usable after a tree has been felled. Our 24-hour tree emergency services do such things as remove trees that have fallen on power lines, homes or are blocking roads and driveways."

This progressive tree care company services all of Palo Alto and the surrounding area. This map better defines their service area, <https://goo.gl/maps/1Q4WiZkExc52>. Since they are a newer tree services provider they have fairly modern trucks and equipment that they use to accomplish their many different tree services with.

Palo Alto Tree Leaders takes care of trees at homes, businesses and government properties too. It was learned that the company provides free inspections and estimates to those in Palo Alto that request them. Their emergency tree services are available around the clock every single day of the year.

When Rose was asked what the company's "go-to" tree service was, she had this to say, "Obviously we feel all of the tree services that we do have great benefits. The most important one we offer is most likely tree trimming. That's because when you do tasks like tree trimming, tree pruning, crown shaping and crown thinning; it not only benefits the health of one's trees but it also benefits the health of other plants in a landscape and makes that overall landscape look much better too."

When Rose was asked why palm tree trimming presented one of the biggest challenges for the workers at Palo Alto Tree Leaders she had this to say, "There are so many different varieties of palm trees in the area. It seems they all get trimmed at different times of the year and you have to use trimming techniques that are unique to each palm variety. Thankfully, our palm tree trimming team has enough palm tree trimming knowledge and experience that it's something that we handle very well."
