

Dr. Hickman Is Giving Families Another Chance at Parenthood with an Affordable Vasectomy Reversal Procedure

February 13, 2023

New Braunfels, TX - February 13, 2023 -
Dr. Mark Hickman has helped countless families across the US experience the joy of bringing a new life into this world with his affordable vasectomy reversal procedures. The doctor is urging men who regret getting a vasectomy and yearn for another chance at fatherhood to call his practice in New Braunfels, Texas.

Dr. Hickman has been able to make vasectomy reversals affordable for many Americans due to his unique approach to the procedure that uses laparoscopic surgery. Using minimally invasive telescopic equipment, Dr. Hickman can offer the procedure much cheaper than other medical providers and with nearly the same or higher assurance. In fact, he is one of the pioneers in the field of microsurgery who started experimenting with it as far back as 1988. Today, he is credited with inventing several surgical instruments, has been awarded a US patent, and is recognized as a contributor to several other minimally invasive patents. He is also often invited to speak on and teach his insights into laparoscopic surgery to other surgeons.

Dr. Hickman also has a personal stake in the service he provides. He attributes his dedication to his faith as a Christian. He is a member of the Apostolate Board for the North American Province of the Missionaries of the Holy Family. He has also served on the Board of Directors of TIPHER (The Institute for Public Education, Health, and Research), a non-profit organization that offers multiple programs for the disadvantaged such as a soup kitchen, diabetes education, GED classes, and a charitable medical/dental clinic.

Dr. Hickman talks about how his faith guides his work at Microsurgical Vasectomy Reversals in New Braunfels by saying, ?I truly feel that many men and families here in the United States have been misled when it comes to the vasectomy procedure. Many of my male patients mention that they became distraught after the procedure and lost their sense of wholeness. They mention how their families were also affected by their decision. The one feeling that I overwhelmingly see in all my patients? eyes is regret. Though I cannot singlehandedly change the way Americans feel about vasectomies, my skills give me a chance to make a difference, even if it may seem small in the grand scheme of things. I get my joy and purpose from the lives that I touch and the gift of life that I?m able to give those who come to me.?

Microsurgical Vasectomy Reversals offers two all-inclusive affordable options. The microsurgical vasectomy reversal cost option of $3,300 includes local anesthesia and an oral sedative. The $4,200 offer is performed under IV sedation and is administered by a Board Certified Anesthesiologist. Both microsurgical options are all-inclusive with no hidden fees.

Several patients have remarked on just how life-changing the vasectomy reversal procedure was for them. One testimonial says, ?Like many men in this world, I made the grave mistake of eliminating God?s gift of creation through a vasectomy. That was roughly 23 years ago. My heart told me it was wrong at the time, and I suffered the consequences of sterility in many different ways. When my wife and I decided it was time to put things back into God?s hands, we turned to Dr. Mark Hickman in New Braunfels, TX. Although we reside in the Denver area, we could see that a trip to TX was the work of the Holy Spirit. We were at complete peace before, during, and after the procedure, thanks to the spirituality of Dr. Hickman and his staff. Although there are no real statistics for success regarding a reversal after so many years, the odds were not in our favor. However, the procedure went well, and the good Lord has blessed us with another pregnancy!?

Readers can contact Microsurgical Vasectomy Reversals in New Braunfels at (830) 660-0600 to set up an appointment or to inquire about the price of a vasectomy reversal. The medical practice even offers exclusive accommodation for out-of-town patients.
