

Aantex Offers Ant Pest Control In Sacramento; Warns About Health Risks From Pests

February 02, 2019

February 02, 2019 - PRESSADVANTAGE -

Aantex Pest Control Norcal has announced that they are offering ant pest control service in Sacramento and nearby cities. They also want people to be aware of the health risks posed by ants and other pests. While people are used to having ants in their homes, these insects can contaminate food because they can carry bacteria on their bodies. Some species of ants may also cause problems in the home by weakening wood beams; others, like the fire ants, have venom that sting and possibly cause allergic reactions. Aside from Sacramento, Aantex offers pest control services in Rocklin, Granite Bay, Roseville, Loomis, Carmichael, Fair Oaks, Folsom, Citrus Heights, Orangevale, Elk Grove, South Sacramento, and Laguna.

Jim Wood from Aantex Pest Control Norcal says, "Our number one goal since opening our doors has always been customer satisfaction. So, when Aantex Pest Control NorCal is called on to rid your home of a pest infestation we will work hard to eliminate the problem quickly, effectively and affordably. Eliminating pests and their potentially damaging effects on both your home and family's health is our number one priority."

Aantex Pest Control Norcal is a family owned and operated business with more than 90 years of combined experience in pest control, both for residential and commercial buildings. They focus on making sure that the

pests are eliminated from the home or any building in a timely manner. This includes making use of Integrated Pest Management (IPM) strategies including evaluating causes, accessing the pest problem, responsible pest management solutions, use of prevention techniques, and monitoring of pest activity. Furthermore, they offer Green Pest Control methods that are both sustainable and effective.

With Aantex's experienced ant exterminator Sacramento homes are inspected for signs of infestation and points of entry that have not been noticed by homeowners, such as wings near food and water sources, chewed wiring or pipes, dirt mounds near the home, lack of good weather stripping in some areas, and high moisture areas. They also provide perimeter protection, home pest inspection, and interior and exterior exclusion treatments. With perimeter protection, pests like wasps, rodents, fleas, ants, and roaches are prevented from entering the home.

These services are valuable because these pests may not only bring health risks but they can also cause damage to parts of the home, possibly destroying electrical wiring, insulation, wood, and other structural materials. Wasps will cause painful stings and bat droppings may carry several potentially dangerous diseases.

Commercial business owners will also benefit from the pest control services provided by Aantex Pest Control Norcal because pest infestation of any kind can damage a business's reputation. There is also the possibility of a commercial establishment getting fined if a pest infestation is not eliminated fast enough.

The commercial facilities that Aantex serves include senior care facilities; office and residential property management; manufacturing and research; lodging and hospitality; warehouse and distribution; educational facilities, schools and daycare; malls; retail stores; pharmaceutical buildings; industrial buildings; office buildings; multi-unit housing, apartment buildings and condominiums; and doctors' and dentists' offices.

Aantex Pest Control Norcal offers a wide range of commercial pest control treatments that are customized based on the particular needs and budget of a business. For instance, by applying IPM measures, clients are able to comply with their environmental protection goals. Focus is made on preventive measures, including the use of non-chemical solutions.

Meanwhile, customer reviews have shown that Aantex really provides effective pest control. For example, Tom H. from Orangevale gave them five stars and said, "Wow. I know no one can fix everything, but the last few years I have had a very big flea problem. The other day I called Aantex to solve this year's attack. After the visit everyone in the home had a nice nights sleep and I know the residual will finish the rest of them off. Finally the flea problem is under control. We are looking forward to the rest of the year service agreement. The people and the dogs thank you."

Aside from ant pest control Sacramento residents can also benefit from other services from Aantex Pest Control Norcal. These include rodent control and exclusion, bedbug extermination and prevention, roach control, spider and black widow control, carpet beetles, flies, wasps in structure, scorpions, bird removal in in structure, flea control, earwigs, bees in structure, silverfish, crickets, and spider web removal.
