Peppy Heating and Cooling Presents Guide on How to Get HVAC Tax Credits in Boise Idaho

February 17, 2023

Boise, Idaho - February 17, 2023 -
Peppy Heating and Cooling, an HVAC services company based in Boise, ID, has presented a guide on their website on how homeowners in Boise can qualify for HVAC tax credits. These new tax credits and rebates provided by the Inflation Reduction Act (IRA) that came into effect on January 1, 2023, are set to put in billions of dollars into the HVAC marketplace, allowing a range of high-efficiency technologies more affordable to homeowners in Idaho, including those residing in the Nampa and Boise area.

The IRA renews the Energy-Efficient Home Improvement Tax Credit and raises the credit limit for installing high-efficiency HVAC equipment, such as heat pumps, furnaces, central air conditioning systems, hot water boilers, etc. The program has been extended up to 2032. These are all designed to encourage homeowners to decrease their carbon footprint by using high efficiency and eco-friendly heating and cooling products. Tax credits are available for: high efficiency air conditioners; high efficiency furnaces; heat pumps; and possibly high energy efficient windows and water heaters.

Brett Shannon, President of Peppy Heating and Cooling, says, "We?re excited about the Heat Pump rebates because it helps homeowners upgrade to a high efficiency heat pump that will increase their home comfort while simultaneously reducing energy bills. The rebates make it easy to enhance your home?s heating and cooling system."

Heat pumps have been gaining in popularity in Boise because just one unit can be used to heat or cool a home, while also reducing energy consumption, energy costs, and greenhouse gases. This means that it no longer matters whatever the weather is, the heat pump installed by Peppy Heating and Cooling can provide the heating or cooling that is needed. They are an American Standard Customer Care dealer and they provide American Standard Heat Pumps that have been designed and built to offer comfort and long-lasting reliability.

Meanwhile, they also offer the ductless mini split or the ductless heat pump, which offers the modern way to cool or heat a home or business. They are a Mitsubishi Elite Diamond Contractor, which means they offer products from the best manufacturer of ductless heat pumps. Mitsubishi Electric is a top manufacturer of ductless systems, which are known for their dependability and reliability. And as a Mitsubishi Elite Diamond Contractor, this means they have top level training and offer a high level of support and service to their customers.

Brett Shannon says, "Today?s heat pump are a power house of efficiency. We sometimes hear consumers complain about a heat pump they had 20 years ago. And that?s just it, today?s advanced heat pump technology is impressive." He adds, "What?s great about a Heat Pump is that just one unit does it all, a heat pump can both heat and cool making it a great solution for many homeowners."

Ductless heating can be used in a number of situations. First of all, it can be used to solve hot and cold spots in the home or office. Second, for homes that are heated with wood stoves, electric baseboard heat, oil, propane, or any other means, ductless heating is the better option. Third, those who need to add an air conditioner to the home or office, may choose a ductless system. Fourth, the ductless system is for homes or offices that don?t have duct work, such as historic homes. Fifth, for those who have a furnace that is over 12 years old and requires replacement, getting a new ductless system may be the better option. And finally, any home with a family member who has asthma or allergies have a better choice with a ductless system. Air ducts tend to gather a lot of dust, dirt, bacteria, viruses, fungi, mold, mildew, etc. And these are blown into the room, causing problems for people with asthma and allergies.

SHANCO Heating and Air, which is now Peppy Heating and Cooling, was established in 2016 by husband and wife Brett and Tenley Shannon. They have initially set as their goal to create a commercial heating and air conditioning company but in their six years in the industry, they realized that they had been doing an increasing quantity of residential HVAC services and also felt that working with residential customers was truly enjoyable.

When in need of more information about HVAC tax credits Boise Idaho residents can check out the Peppy Heating and Cooling website or contact them on the phone.
