New Drug-Free Laser Acne Treatment Available 1st at Center for Aesthetics Idaho Falls

March 06, 2023

March 06, 2023 -
Center for Aesthetics, is proud to be the first clinic in Idaho Falls, ID, and in Jackson Hole, WY, to provide AviClear, the drug-free, non-toxic laser acne treatment for all ages. AviClear is the first and only FDA-cleared laser to treat mild, moderate, and severe acne in just three 30-minute treatment sessions.

Unlike most traditional acne treatments, AviClear does not have any harmful side effects, is completely free of chemicals and toxins, and has been approved as safe for all skin types and tones. The AviClear process is a life-changing laser treatment for patients struggling with acne. This revolutionary treatment works at the source of the acne, using wavelengths to target and down-regulate the sebaceous glands in a selective manner, which is similar to the way Accutane works.

The safe AviClear laser specifically targets the sebaceous glands, not the skin surface, thereby making a person with any skin type a suitable candidate for the procedure. In all complexions, there were no adverse effects or pigmentary changes, even in darker skin tones.

AviClear offers patients an alternative treatment option for acne medications like isotretinoin (Accutane) and oral antibiotics, which can come with far more serious side effects. The cystic acne treatment is ideal for a majority of patients. Today, at least three years? worth of data shows that AviClear?s effect endures for most patients.

The treatment has a high patient satisfaction rate, with a majority of patients reporting they were very satisfied with the improvement in their skin just one month following their first session, and over 90% of patients believed they looked better after their third session. Another positive of the treatment is that a patient?s skin continues to improve the further they continue with the series. Almost 90% of patients had observable clinical improvement of their acne at 6 months, and that improved to 92% by 12 months. Over two-thirds of patients were deemed clear or almost completely cleared of acne at 12 months. Some study

subjects experienced clear skin for up to two years following the recommended course of treatment.

There are many benefits of AviClear Laser for Acne. It is a quick treatment, taking only 3, 30-minute sessions. It is safe for all skin types and has long-term results. There is little to no downtime and no aftercare, (except sunscreen). It is ideal for all types of acne, including cystic, hormonal, teenage, and adult acne. All who have suffered from acne or had friends or family with acne know the struggle ? the frustration of trying dozens of different topicals without consistent or enduring improvement. Some may feel that their only option is to take oral medications like minocycline or Accutane, which have significant side effects. AviClear offers the first effective long-term solution to acne without any of these toxic side effects or long-term problems.

The Idaho Falls acne treatment clinic promises to be a patient?s guide and personal cheering section over the years, counseling them on the best ways to prevent and address age-related concerns. The clinic prides themselves on personalized service, and they pledge not to ?sell? patient?s any treatments just because they own the technology. Center for Aesthetics values and cherishes the lifelong relationships and trust they have forged with so many of their patients and hope to continue doing so. CFA offers several other types of laser skin care, including Clear + Brilliant, Fraxel Laser Resurfacing, Ultherapy, Vascular Laser, and Vivace Microneedling treatments.

Center for Aesthetics is owned and operated by a board-certified and ASOPRS (American Society of Ophthalmic Plastic and Reconstructive Surgery) fellowship-trained oculoplastic surgeon. The team specializes in non-surgical aesthetic medicine, including laser hair removal, CoolSculpting, Botox, Dysport, RHA Dermal Fillers, Hydrafacials, Clear + Brilliant, Microneedling, PRP platelet-rich plasma therapy, laser treatments, and other de-aging protocols created by Dr. Catherine Durboraw that are only available at CFA.

To learn more about the treatments offered by the Center for Aesthetics, patients may visit the clinic?s official website. They can also be reached via phone or email for further inquiries.
