Glenferrie Dental Clinic Introduces All-on-4 Dental Implant to Melbourne Patients

February 21, 2023

February 21, 2023 - PRESSADVANTAGE -

Glenferrie Dental, a leading dental clinic in Melbourne, is proud to announce the introduction of the All-on-4 dental implant treatment to its patients. The innovative treatment, which has gained popularity among patients for its efficiency, affordability, and long-lasting results, allows patients to replace a full arch of missing teeth with just four strategically placed implants.

"At Glenferrie Dental, our goal is to provide our patients with a natural-looking and functional smile that will last a lifetime," said Dr. Peter Laird, Dentist at Glenferrie Dental Clinic. "We are excited to introduce the All-on-4 dental implant treatment to our patients, which is a highly efficient and cost-effective way to replace missing teeth."

The All-on-4 treatment is a state-of-the-art solution for those looking to replace missing or damaged teeth. It is a minimally invasive procedure that requires less bone and uses less implant than traditional dental implants. The treatment is suitable for patients who have lost most or all of their teeth and are looking for a permanent and stable solution to their dental problems.

"All on 4 is an excellent option for patients in Melbourne who are looking for a reliable and efficient way to replace their missing teeth," said Dr. Laird. "The treatment can be completed in just one day, and patients can eat and speak confidently immediately after the procedure. Additionally, the All-on-4 procedure is minimally invasive, and patients experience minimal discomfort during the healing process."

Glenferrie Dental - All on 4 Melbourne is equipped with the latest technology and equipment to provide patients with a comfortable and efficient experience. The clinic's highly skilled and experienced team of dentists and implant specialists use only the highest quality materials and implant systems to ensure the best possible outcome for patients. They also offer a range of sedation options to make the procedure as stress-free as possible.

"All our dentists are highly active, long-standing members of the Australian Dental Association, with over 60 years of combined clinical experience between them," said Dr. Laird. "At Glenferrie Dental, we prioritise patient care and satisfaction, and patients can trust that their dental implant experience with us will be a positive one."

All-on-4 dental implants are an ideal solution for someone who has lost all of their teeth in their upper or lower jaws or both jaws and wishes to replace them with a permanent, natural-looking collection of replacement teeth. By replacing teeth with implants rather than adjustable dentures, the All-on-4 Implants systems enable people to enjoy a complete and healthier lifestyle.

"At Glenferrie Dental, we are committed to providing our patients with the best possible dental care and services," said Dr. Laird. "We are excited to introduce the All-on-4 dental implant treatment to our patients in Melbourne and look forward to helping them achieve a natural-looking and functional smile that will last a lifetime."
