December 03, 2015 -
Compare Ski Transfers, a business in Derbyshire, United Kingdom, has announced the launch of their brand new website. This website has been designed to make it much easier for customers to book a ski transfer. The company has also made their services much more affordable. Several customers have already expressed their gratitude for having this kind of service at their fingertips. The service can be accessed through https://www.compareskitransfers.com.

"Skiing is traditionally an expensive sport," says Rebecca from Compare Ski Transfer. "There are so many added costs to these holidays, like slope passes and ski rental. And then, there are the transfers from the resorts to the actual slopes. Our website is designed to help people quickly and easily find the most affordable ski transfers for their favorite ski area."

The website has been designed to save customers time and money. Time can be saved simply because it is an online service, meaning people can access it at a time that is convenient to them. Furthermore, the service itself is very quick. By comparing the market, people can also save a lot of money.

One of the things that make this service unique is that there are no add-ons for using the services. This means that someone who finds ski transfers to Val Thorens through the online service will pay exactly the same as someone who books directly. As such, the potential to save more money than through standard routes is greatly enhanced.

"I love the service," says one happy customer. "You simply say where you want to go and when and with how many people, and it finds you the best deals. The quotes are instant and you can book them straight away from the same location. Absolutely perfect."

Compare Ski Transfers prides itself on having all the best transfer companies in one place. The website is very easy to use and also includes other pieces of vital information, as can be seen, for example, on https://www.compareskitransfers.com/resort/val-thorens. Hence, those who aren't entirely sure about where to go yet can also greatly benefit from the website and service, introducing them to the various resorts that

are out there.
