

Why Teachers and Kids Are Loving the EX-20 Electric Pencil Sharpener by EcoElectronix

February 13, 2019

February 13, 2019 - PRESSADVANTAGE -

With the busy lives of students and teachers, It is no surprise they are often finding themselves with dull or broken pencils in need of sharpening. Electric pencil sharpeners are being purchased more frequently than ever due to the pain in wrists and hands that manual sharpeners have been known to cause.

EcoElectronix is a popular family-owned company that many teachers have been using to purchase high-quality electric sharpeners and staplers from. Their top-selling EX-20 electric pencil sharpener has over 200 reviews from very satisfied customers. Recently, EcoElectronix received a 5-star review from a customer who teaches 1st grade and was very pleased with how well the sharpener performed in her classroom.

"The best pencil sharpener I have ever used. My old, electric classroom sharpener kicked the bucket and I had to find a new one. I did some research through reviews and stumbled across EX-20. At first, I was hesitant because I've seen practically every electric sharpener known to teachers but I decided to give it a try. I'm two weeks into using it and I've put it through some heavy usage (24 pencils sharpened in a row). It hasn't shown any wear and it has a nifty feature where it clicks off when the pencil is sharpened. I can even sharpen the students' colored pencils without the soft lead breaking off (something I could never do with my

old sharpeners). Overall, I am highly satisfied with my sharpener and so are my students!?

One of the reasons the EX-20 appeals to teachers with young students is because of their safety features. The automatic sharpener has a built-in safety sharp feature that stops the sharpening mechanism from working if there is a piece missing, thus preventing accidents and injuries. Another bonus feature of the sharpener is its auto-off feature, the auto-off feature is ideal for kids who don't know when to stop sharpening.

Once the selected sharpness is reached, the EX-20 will stop sharpening, this also prevents pencils from breaking, and lead from being wasted. Another one of EcoElectronix customers whose teachers stated the auto-sharp feature to be beneficial with their students. ?Got this for my classroom and it works wonderfully! Our other sharpener does not do well on colored pencils and this one is amazing. I love that I can put batteries in it instead of having it always plugged in. The dial on the side for sharpness is great, students always like to have their pencils pointy sharp but they often break quickly, I can adjust it on here and they know when it shuts off that's it and it's ready to go. Definitely worth it!?

Customers can choose between using the sharpener with batteries or the all included adapter, this allows for easy transportation and storage between students and classrooms. To purchase the EX-20, shoppers can visit Amazon.com where it is available for \$22.73 and with an all included lifetime warranty.
