

EPS Landscaping & Tree Service Offers Landscaping and Other Services in Broward County Florida

March 08, 2023

Pembroke Pines, Florida - March 08, 2023 -
EPS Landscaping & Tree Service LLC, a company located in Pembroke Pines, FL, wants to highlight the broad range of landscaping and tree services for Broward County, especially in Pembroke Pines. These include: landscaping, sod installation, tree services, hardscaping, tree relocation, stump grinding, commercial landscape services, commercial services, lawn care services, palm tree trimming, sprinkler repair, landscape design, lawn insect control, landscape maintenance, pool scaping, retainer walls, tree pruning, tree removal, tree planting, lawn mowing, emergency tree removal, sprinkler system installation, and lawn maintenance.

EPS offers landscape design in Southwest Ranches, which is situated on the eastern border of the Florida Everglades. Southwest Ranches is located 15 miles southwest of Fort Lauderdale and is the 30th incorporated municipality of Broward County. It is one of the most beautiful places to live in South Florida because of its many attractive natural amenities, high quality of life, and unmatched characteristics.

EPS Landscaping & Tree Service has considerable experience and knowledge regarding the kinds of

plants, grass, trees, and the pests that are detrimental for them. Tropical landscape design is commonly used for homes in the Broward County area because of the humid subtropical climate of Southern Florida. This kind of landscaping is much more challenging to map out compared to the other types because it usually makes use of a wider range of plants and trees that require various kinds and levels of care. Each plant or tree will have different needs when it comes to the amount of sunlight and watering, for instance. In addition, tropical landscaping often requires various elements such as: lava rock; water features like a small waterfall or a pool; large and vibrant leaves; and island decor like tiki torches and hanging lights.

Landscape design in Broward County often includes landscaping around a swimming pool. A backyard pool area is preferred by many homeowners because it provides a place where family and friends can gather for some fun and quality time. Pool scaping usually has three main goals: privacy, shade, and aesthetics. Since it is a place where family and friends spend time together, there is a need for privacy. A well-designed landscape around a pool often engenders the feeling calm and relaxation and therefore should be private and free from disturbance. Some of the elements to include are structures and fences, decking, and some rocks and trees.

EPS Landscaping & Tree Service also offers commercial landscape design services. These services are designed to enhance the curb appeal of the commercial property and enhance its market value. Curb appeal will not just boost the property?s value but it will also attract and retain clients. Customers will naturally be attracted to a business located in a commercial property with beautiful landscaping.

The plants and trees around the commercial building can also enhance the privacy and security of the company. Furthermore, an attractive commercial landscape shows that the business cares for the environment. This can attract more customers, especially those who prefer to support businesses with eco-friendly practices. The plants and trees around the commercial building will also provide for better air quality, which is also beneficial for all who are working in the company, including visitors and clients.

EPS Landscaping & Tree Service is a family owned and operated firm that has been offering lawn care, landscaping, and tree care services in the Broward County area for over 20 years. They always strive to offer the most competitive prices while ensuring that the quality of their services is not compromised. They offer their services in Broward County, including Southwest Ranches, Hallandale Beach, Hollywood, Coral Springs, Dania Beach, Fort Lauderdale, Deerfield Beach, Pembroke Pines, and Pompano Beach.
