

The Center for Aesthetics Launches Splendor X Laser Hair Removal Service

March 04, 2019

March 04, 2019 - PRESSADVANTAGE -

Idaho Falls, Idaho ? The Center for Aesthetics (CFA) is proud to introduce Splendor X Laser Hair Removal. CFA is the first in both Idaho Falls, ID, and Jackson Hole, WY to provide this revolutionary new laser hair removal technology. The Splendor X process is safer and faster than the older techniques, and better results.

By using two distinct laser wavelengths and the industry?s largest working spot size that is square in shape, the Splendor X provides the fastest, safest and most sophisticated laser hair removal treatment available today.

Always searching for the most innovative medical technology for her patients, Dr. Catherine Durboraw considered the many benefits of Splendor X for all her laser hair removal needs and knew it was the best for her patients. CFA has launched the revolutionary Splendor X service just in time to get ready for vacation season. ?Another benefit of Splendor X we are very excited about is that it works on all skin types, as well as all skin tones,? says Dr. Catherine.

The BlendX technology automatically adjusts laser wavelength to customize treatments based on a person?s

hair color as well as thickness. It is also great for Latino and African American skin types that would otherwise need special treatment. Splendor X provides uniform coverage of the specific area which allows for faster and more effective results. The larger square-shaped laser spot size ensures more complete coverage minimizing the need for touchups or missed areas in the specific treatment area once it has been covered.

Beauty maven Huda Kattan had this to say about the new technology, "Although many lasers have promised to be painless, quick, and safe many have failed us. That's where Splendor X by Lumenis comes in. It is not your average hair removal laser. This technology-advanced laser is the first of its kind..."

Dr. Catherine explains how the new technology works, "Usually to get rid of hair, you need to use high wavelength settings which can make the treatment more painful with an increased risk of side effects. However, Splendor X works in a gentler way by combining two laser wavelengths at lower settings making treatments more comfortable and safer."

This advanced laser hair removal technology was featured at the American Society of Dermatological Surgery in 2018.
