

SilverSaver Review On YouTube Helps First Time Gold and Silver Investors

July 20, 2015

July 20, 2015 - PRESSADVANTAGE -

Lawrence, KS business SilverSaver has been positively reviewed on YouTube. The company's goal is to make sure first time investors are able to purchase silver and gold safely and in such a way that they are able to actually profit from it. The independent SilverSaver Review clearly highlights how the company has hit its goals.

The first SilverSaver video discusses how people are able to purchase silver and gold in a safe manner. The second video discusses what can be expected when a box is actually received from SilverSaver. The SilverSaver review is very honest and clearly shows the pros and cons of the company.

Josh McCleary from SilverSaver says, "People must understand that there is a big difference between the "paper" products or stocks that can mimic the price of the metals, and true ownership of physical metals. Physical ownership is essential in an age where digital assets can disappear. While there are hundreds of places to purchase physical gold and silver, most require a significant investment of time. These include traveling to coin shops or purchasing from a trusted dealer. These options usually expose the customer to a significant gap between the price they pay for the metal, and what the dealer will pay them for the same metal tomorrow. Will it be the same when you want to sell? Individuals need to do their homework. We have used technology to close that gap, and to make acquiring precious metals easier. Savings schedules are the way that we at SilverSaver.com do the heavy lifting for you. You tell us exactly what day of the week or month you want your purchases to occur. Setting a recurring schedule to buy gold or silver weekly, monthly, etc., provides an easy way to acquire this portion of your diversified portfolio. You can set it once and know that you will remain on course to have a well-rounded and healthy financial portfolio. It doesn't get any easier than that."

Those who are interested in investing in silver and gold should take SilverSaver into consideration.

Hunter Riley III, the author of "Stack Silver Get Gold: How to Buy Gold and Silver without Getting Ripped Off", which is also the #1 best selling precious metals investing book on Amazon, says that if you're a beginning

investor and want to start buying gold and silver safely and with little money, his go to source is SilverSaver. SilverSaver helps beginners, and pros alike, easily and automatically buy gold and silver online.
