

Illinois Company Announces Permeable Paver Brick Cleaning

May 28, 2019

May 28, 2019 - PRESSADVANTAGE -

A River Grove, Illinois brick paving company has announced that they are now offering permeable paver cleaning and repair. The company provides brick paving services for customers in and around the Greater Chicago region.

Frank, a representative for the company says, "We are pleased to offer our customers cleaning and repair services for their pavers. We know that redoing patios, walkways and other paved surfaces is not always affordable. With our repair and cleaning services, these pavers will look brand new again, without the cost of having them replaced."

The company states that they offer a number of services that range from brick paver patios for homeowners to larger commercial services. Frank adds that the company enjoys helping homeowners to choose a design that will instantly transform their homes. He states that many homeowners come to them without really knowing what they want to do, and the company helps them to design an outdoor living space that completely changes the look of their backyard.

"We love helping people to put their vision into a reality," says Frank. "Just seeing how in awe they are at what we can put together is really humbling for us, and all of our services are designed to not only improve the aesthetics of a property, but to help to raise its value, as well."

Old World Brick Paving has been providing paver services for a number of years. Frank says that over these years, they have always ensured that their customers are completely satisfied with their end results. He adds that homeowners who are considering selling their homes can add a paver patio or any number of other designs to that home in order to significantly raise the home's value.

"Homes that have brick paver patios, paver lined driveways, and any number of other outdoor design command a much higher price on the market than those that do not," says Frank. "One of our goals is always to help our clients to raise their property value, and we offer a wide range of designs that can help them to do this."

The company can provide a wide range of hardscape designs, as well as outdoor kitchens, paver walkways, pergolas, patios, driveways, and various other outdoor design elements. Frank adds that they can also repair and clean any existing paver designs that the home may already have in place.

Those who are interested can see a gallery of images on the company's website that gives a good look at some of the designs that they have created for their clients. Frank states that the company can now repair or clean paver driveways, patios or walkways and give them a completely new look once again.

He states that homeowners who have paver designs in their outdoor living spaces who would like to inquire about cleaning or repairing those pavers can simply contact the company and schedule a consultation. One of the company's skilled technicians will come to the home and evaluate the pavers, explaining to the homeowner what can be done and offering a quote for the project at hand.

Frank says that the company also offers a testing video that consumers can watch to learn more about what they do and how they do it. The company states that they look forward to helping clients with all of their outdoor living space design needs, and those who are interested can visit them on their website to learn more about the wide range of services that they offer and to get an idea of the types of designs that they can build.

The company is a family owned and operated company that offers a number of brick paver design, installation and repair services to those in and around the Greater Chicago area. Those who are interested in learning more can visit the company on their website or contact them directly by phone or email to schedule an onsite consultation for any of their paver services.
