

Emergency Mitigation Services Provider in Philadelphia Earns Five Star Reviews

June 26, 2023

June 26, 2023 -

MDL Restoration, a company based in Tullytown, PA that provides water damage restoration Philadelphia residents can depend on, takes pride in the many five star reviews they have been receiving from satisfied customers. The emergency mitigation services provider has an overall rating of 4.7 out of 5 stars on Google. The company offers tri-state water damage restoration services for damages caused by flooding caused by severe storms, including plumbing problems, roof leaks, water-damage appliances, and more.

In a recent five star review, Crystal D. said, ?When I moved into my new home I had MDL Restoration Inc help me with previous water damage to a corner of my wall. I know the business has been around for 19 years or so. I had no doubt that they knew what they were doing. They were prompt, friendly, professional and quick to respond and come out to take care of the damage right away. Great team in the office and out in the field. The company was so nice that I wanted to work for them. Family oriented business owners who really care about the work they do and their customers. Highly recommended.?

Water damage is a serious problem for many homes and other properties in the Philadelphia area, which usually experiences severe weather that includes flooding, lightning, thunderstorms, and tornadoes. Flooding is often caused by excessive rain affecting the water levels of the Delaware River, Schuylkill River, and local creeks and streams.

Natasha L., a spokesperson for MDL Restoration, says, ?If you have discovered water in your home or business, MDL Restoration Inc. can return your property to its pre-loss condition without delay and to your satisfaction. Our team is ready to head to your property soon to help you overcome the current challenge that you are facing.?

They want to emphasize that water extraction has to be done as quickly as possible after a flooding to prevent mold from growing in the water-logged areas. Mold growth has to be avoided because it can significantly prolong the restoration process and make it much more costly. Structural parts of the home that are soaked in water in a long period of time may also weaken. That is why the restoration specialists from MDL use modern and innovative equipment to extract the water efficiently.

Homeowners and other property owners may have some worries about the water damage restoration service. They need not worry because the restoration experts from MDL will systematically get rid of the water and ensure that the damage to the client?s belongings is minimized.

Aside from restoration services for water damage, they can also provide fire, smoke, and odor restoration services. They will provide clean up services after a fire that can range from comprehensive removal of a structure to simply cleaning air ducts. The smoke from the fire will require certain cleaning procedures to ensure that the home is safe and odor removal will usually include getting rid of stubborn proteins.

If there is mold growth, MDL Restoration can also provide mold remediation services. Whatever the cause of the presence of water inside the home that resulted in mold growth, they will assess each case based on the size of loss, the type of water, moisture levels, and potential secondary damage, and then provide the necessary remedy.

Founded in 1980, MDL Restoration Inc. is a comprehensive service emergency mitigation and restoration contractor for homes and businesses in Eastern Pennsylvania, Delaware, and New Jersey. The company specializes in helping customers recover from disasters such as flood, mold, fire, wind, and more.

Natasha L. from MDL Restoration says, ?Our restoration experts are here to help you get your home or business back to normal after an incident with water, fire, mold, biohazard and more. We aim to provide top notch restoration services for the Philadelphia and tri state area. Our restoration experts will be on site in 2 hours or less! When dealing with an emergency restoration, quick response is absolutely essential.?

Those who are interested in learning more about the various services provided by MDL Restoration, such as fire cleanup and repair, can check out their website or contact them on the phone or by email.
