

Newport Beach Plastic Surgeons Present Lead Surgeon: Dr. Aaron Kosins

June 14, 2019

June 14, 2019 - PRESSADVANTAGE -

Newport Beach, California based Dr. Aaron Kosins, an acclaimed plastic surgeon working as lead surgeon at Aaron Kosins MD, has recently updated his introductory webpage, presenting himself and his achievements to the community.

Dr. Aaron Kosins is a certified plastic surgeon that specializes in face, nose, breast, and body plastic surgery. He takes pride in working closely with his patients to achieve their desired results. He states, "My philosophy is to listen very carefully to the wishes of my patients. I believe that my patients and I are a team, and we will only be able to achieve the best results by being open and listening to each other. This is taken to diverse aspects of the procedure, as my patients and I often make decisions together regarding what might be the best for them. My goal is to be the doctor for all your aesthetic needs, not just a one-time surgeon."

Having graduated with honors from the University of Southern California and the University of California at Irvine, Dr. Kosins prides himself on working at the cutting edge of Plastic Surgery techniques and principles. He affirms that he makes an effort to develop a relationship with his patients before and after the surgery, making sure to check on their improvement in the weeks following their procedure.

On their website, Aaron Kosins MD showcases a patient's testimonial that demonstrates Dr. Kosins' commitment to his patients during the different stages of surgery. The review, written by Ali M. says, "I had always disliked my nose. I had a deviated septum which prevented me from breathing through my left nostril. I wasn't happy with my nose's shape as I always felt like I had a plunging tip, combined with dorsal bumps and a lack of definition. Dr. Kosins listened to my concerns and explained exactly what he would do to improve the look and function of my nose. He took my photos and walked me through the surgery plan thoroughly to make sure that we were on the same page. I did not want to look like a different person, just a better version of myself."

Dr. Kosins notes that the concerns that Ali expressed are a common occurrence in plastic surgeon patients. He explains that while people often feel uncomfortable about minor aspects of their look; more often than not, they are only looking for minor improvements in specific places, rather than a completely new look, as it was the case for Ali. Dr. Kosin says, "It is important to determine the extent of the patient's discomfort with their look and to establish exactly what they expect of their new look. Not every patient needs or wants the same surgical solution, and treatment plans are uniquely tailored to each patient."

Ali continued to share his experience after the surgery process, saying, "Two weeks after the surgery, I was recovering nicely. I only had one tiny mark underneath my nose where the incision took place and it was barely visible. Dr. Kosins has been in contact with me constantly, asking about whether or not I was feeling any discomfort, letting me know that he was there for me if I ever needed him. He is truly one of the best Newport Beach plastic surgeons, as he was able to deliver results that others said were not possible, or would take multiple procedures. The results are beautiful, and I couldn't be happier with my new look."

Dr. Kosins asserts that he is able to achieve such outstanding results due to the fact that he approaches each procedure considering the patient's skin health and nutrition as a whole, taking into account the effect that these may have on the outcome of the surgery. He states that ensuring that the patient has healthy skin and nutrition also allows for faster recovery time, improving the overall surgery experience.

The surgery procedures offered by the acclaimed Aaron Kosins MD surgeons include Facial Rejuvenation, Breast Implants, Rhinoplasties, and Body Contouring. The local surgeons invite all those interested in learning more about their procedures to visit their website, where further information can be found, as well as patient testimonials and reference pictures.
