Simply Clever Cards Provide Multiplication Flash Cards That Are Different From Normal Flash Cards on The Market This Christmas

December 23, 2015

December 23, 2015 - PRESSADVANTAGE -

Saratoga, FL - Simply Clever Cards have designed an innovative set of arithmetic flash cards. This holiday season, parents can get a gift for children that also acts as an educational tool. It assists in teaching children core concepts in mathematics. The company stated that the multiplication flash cards are different than the normal flash cards on the market because it allows users to play traditional games and can be utilized in various settings. The multiplication flash cards can be purchased from the giant online shopping network, Amazon.

The multiplication flash cards provide the user with a chance to play normal games involving mathematics that can give a fun atmosphere this Christmas. The arithmetic card deck comes with a small manual that can give users options for a variety of specialized games that children can play. Additionally, the deck can be used to play regular card games such a UNO, War, Memory, Old Maid, Go Fish and Crazy Eights.

The multiplication flash cards are capable of doing this because they have fifty two cards which are similar to a normal card deck. However, the deck comes in four distinct colors and with cards numbered from zero to

twelve. The deck even contains four jokers like a regular card pack.

Aside from being used to play traditional card games, the multiplication flash cards prove to be different from the other flash cards on the market because of its versatility. The deck of cards can be used in various settings and activities. During the Christmas period it can serve as a fun and innovative way to keep children entertained.

These multiplication flash cards can provide a suitable resource for family events and outings. They can give youngsters the ability to have clean and healthy fun while at the same time lending to providing an educational atmosphere. The arithmetic cards are useful for family trips, beach outings and even barbecues. The deck of cards can keep children occupied while at picnics, outdoors at social events and also birthday parties. According to Simply Clever Cards, the user can learn arithmetic in an easy yet comprehensive way.

One Amazon reviewer remarked, ?Simply Clever Arithmetic cards are designed to play several ways, and come with clear instructions on how to do that! Has a nice little box to keep everything together....I am impressed with the time and forethought put into designing this card set! My boys 9 and 7 are the perfect ages for this game as the 9 year old struggles with multiplication, and the 7 year old loves anything to do with numbers!! It reinforces math facts as they play!?

Customers can purchase five decks of the multiplication flash cards and receive 8% off their order total. All they have to do is enter the code SCC05G08 at checkout on Amazon.
