New Blog Launched On Dumpster Rentals

December 14, 2023

December 14, 2023 - PRESSADVANTAGE -
Kansas City, MO based Northland Dumpsters has launched a new blog that aims to help the community choose the right dumpster for their next project. While this may appear to be a straightforward matter on the surface, the company says a few tips can help them save money and minimize the risk of delays. The blog?s content will help them avoid such setbacks.

?From understanding the various dumpster sizes and their capacities to navigating the nuances of rental agreements, pricing structures, and local regulations,? the blog says, ?being well-informed is critical to a successful rental experience. This guide will equip you with the top 10 crucial insights into dumpster rental at Northland Dumpsters. Whether you're a first-time renter or a seasoned contractor, these tips will help you make informed decisions, ensuring your project runs smoothly and efficiently.?

Before placing an order for a dumpster, the company says, customers should make it a point to understand the relationship between dumpster sizes and their capacities. Homeowners and other parties who are engaged with relatively minor projects, for instance, will likely benefit from renting one of the smaller dumpsters on offer, such as the 14-yard dumpster. This dumpster, the company says, is ideal for projects on

the small and medium scale, and it will satisfy the vast majority of the community?s needs.

On occasion, however, even homeowners will have a need for larger dumpsters. Here, the company recommends the 20-yard dumpster as it is suitable for estate-wide cleanouts or even widespread landscaping work. Northland Dumpsters also works with commercial clients, such as offices and contractors, and they are similarly welcome to make use of any dumpster they require.

At the upper end of the scale is the 30-yard dumpster, which is capable of meeting the waste management needs of major construction and demolition projects. It is unlikely that homeowners can make use of this dumpster variant, but the company says it is not impossible. If there are any questions regarding the right dumpster size for a project, a customer can always contact the team directly for additional tips and information.

The blog adds, ?Selecting the appropriate dumpster is crucial for efficient waste management. For instance, heavy materials like concrete or bricks are best suited for smaller dumpsters due to weight limits. In comparison, larger dumpsters are ideal for bulkier items like furniture or yard waste. Assessing the nature of your project's waste will guide you in choosing the most suitable dumpster.?

Customers will be pleased to learn that the company operates on a flat pricing structure. Regardless of the nature of their project, a dumpster will always be made available to them at the same price point (subject to other variables which the customer will be made aware of in advance). The rate is inclusive of delivery, pickup, capacity, and a standard rental period, which usually extends up to 7 days, and it will not change unless the customer has additional requirements. Notably, Northland Dumpsters adds a small fee in the event the customer wishes to exceed weight limits, extend their rental by a short period, and so on.

While dumpsters are designed to be a catch-all that can take almost any type of trash or discarded item, the company says there are certain materials that require additional precautions, such as segregation. This typically involves hazardous materials, such as chemicals, batteries, and asbestos. Additional fees or penalties may apply if these materials are improperly disposed of.

Renting a dumpster is a fairly straightforward process, the company says, especially since, ?Planning is vital when renting a dumpster. Northland Dumpsters offers an easy online booking system, allowing you to schedule a delivery and pickup according to your project timeline. It's advisable to book in advance, especially during peak seasons, to ensure availability.?

The blog offers more advice that customers may benefit from, and they are welcome to read through it at any

time. As always, however, Northland Dumpster?s customer support team is on hand if a customer wishes to discuss their waste management needs further. Interested parties can call the company today to speak with a representative.
