

Water Damage Services Provider In Salt Lake City UT Now Available 24/7

September 24, 2019

September 24, 2019 - PRESSADVANTAGE -

Action 1 Restoration of Salt Lake City, a water damage repair and restoration company, has announced that they are now available 24 hours a day 7 days a week for water damage and mold remediation services. The company has new partners, which means that they are now able to offer response times for water and flood damage in less than one hour in most cases.

Eduardo Sapp, General Owner of Action 1 Restoration of Salt Lake City, says, "When it comes to water damage restoration emergencies, we are specialists and understand the importance of emergency services and fast response times. And now, we have new partners, which means we are much faster with our response time and we can provide our services 24/7."

He continues, "We use state-of-the-art equipment to help with extracting the water and drying out your home or business. We also use special tools to help test the moisture in the air to help prevent mold growth."

That they are able to provide their services 24/7 is significant because water and flood damage to a home or business usually occur when least expected. It is therefore important to have a team from Action 1 Restoration and their partnered contractors ready to provide assistance when disaster strikes.

Action 1 Restoration of Utah contractors are capable of doing water damage restoration and remediation for both residential and commercial buildings. They have a strong track record of providing restoration services in Salt Lake City and nearby areas. An important factor that has helped in customers being fully satisfied with their service is the length of their experience in the industry and their knowledge in knowing exactly what is required to resolve just about every type of water damage.

Action 1 Restoration team members also make use of the best equipment to offer the best possible service to their clients. They invest in state-of-the-art tools and equipment that they use for their restoration services,

such as heavy-duty pumps, dehumidifiers and moisture removers.

Water damage restoration and remediation from Action 1 Restoration is a six step process. The first step is for the client to call them as soon as possible. Broken pipes, water leaks and floods usually occur during unexpected times, so the team members from Action 1 Restoration are ready 24/7 for such emergency calls.

The second step is assessment and preparation. The information provided by the client is forwarded to the company's technicians who will evaluate the situation and will also provide an initial estimate for the entire job. A team will then visit the home or business establishment to perform an inspection.

The third step is the removal of the water. This is done after locating the leak and turning off of the water main supply if such was the cause of the flooding. After this, the fourth step is to dry out the area with air dryers and air blowers. They will use moisture meters to ensure that the area has been properly dried out. This is a critical step because the water may have seeped into areas that are difficult to access, such as the walls and floors.

The fifth step is the cleanup and disinfection. After drying out the affected area, the team will proceed with cleaning the furniture, clothing, and other personal items. They will also apply antimicrobial treatments and use air scrubbers and fogging equipment to disinfect the area.

The sixth and final step is the repair and restoration. The goal of this step is to bring back the original condition of the home or office before the water damage. Sometimes this only needs some minor reconstruction such as the replacement of a number of drywall panels. However, there may be times when the damage is so extensive that it would need the rebuilding of a whole room.

Those who require the services of the Action 1 Restoration of Utah team can check out their website or contact them on the phone or through email.
