

Homebuilders Hardware Launches New Website

November 26, 2019

November 26, 2019 - PRESSADVANTAGE -

Homebuilders Hardware, a Commercial Door Hardware company based in Airmont, New York, has released a new version of their website. This is the fifth version of their website since 2005, and they continue to enhance the site to be optimized for customer ease of use. The new site is a clean e-commerce site, and very easy to navigate, offering customers an opportunity to purchase all types of door hardware products, especially door hardware like commercial door closers, exit devices, hinges, knobs, and handles. The company carries the venerated brand "Lawrence Hardware" which began in 1876 as a provider of hardware to enterprise customers, and they are still trusted by a number of well known enterprises. The list of customers who use Homebuilders Hardware to supply their door hardware needs includes the United States Army, the United States Navy, Princeton University, Cardinal Health Systems, Upper-Class Hotels and Clubs, Gas Stations such as Exxon and Shell, Churches, Schools, Banks, Laboratories, and Manufacturing facilities. Interested customers can find this new website at <https://www.homebuildershardware.com/>.

Homebuilders Hardware carries a full line of ANSI/BHMA Listed Commercial Door Hardware, which is produced by Lawrence Hardware. Lawrence Hardware is a well known American company that has been manufacturing top-grade commercial hardware since 1876. Up until now, door hardware from Lawrence Hardware was only available via the trade, and could not be purchased by the regular consumer or end user. These quality door hardware pieces are now available through Homebuilders Hardware, who has sole rights to sell these Lawrence Hardware products online.

One item which Homebuilders Hardware is featuring right now is Solid Extruded Brass Hinges. These hinges have been installed in thousands of high end homes, as well as a number of upper-scale hotel ball rooms and convention centers. Unlike many stores and websites, which require a long wait before an order of solid brass hinges will be filled, Solid brass hinges are fully stocked and available at Homebuilders Hardware and ship the same day you place your order. In fact, they can be found in a variety of colors at this link: https://www.homebuildershardware.com/product-category/hinges/?fwp_subcats_hinges=residential-architectural&fwp_base_material=solid-brass . The brass hinges come in a variety of options, including 5

different sizes from small to large, 5 choices for hinge tips, and 9 different architectural finishes. Most hinges will include ball bearings, and in some sizes unlacquered hinges are available too. Some of the finish options are Polished Nickel (US14), Flat Black (US19), Oil Rubbed Bronze (US10b), and Satin Brass (US4). All of these options are in stock and will ship to the customer immediately after ordering. This commitment to providing solid brass hinges and other hard to find luxury items to all interested customers exemplifies the pride Homebuilders Hardware has in servicing their customers with utmost customer service every time. As a company, Homebuilders Hardware is excited to enter the new year with a renewed commitment to providing their customers with the excellent quality and service that they have come to be known for.

The reviews that customers give to Homebuilders Hardware just goes further to show the company's desire to please. One review, that they received from a customer just last week, reads: "Wow! I just received my hinges and opened the box, and I'm just floored. They were very well packed, and arrived in perfect shape. I opened one up to see what I plunked down my money for ... and these are hands-down the nicest hinges I've ever held in my ancient woodworker's hands. Just beautifully made, in absolutely every detail. There isn't a single thing about them that I'd change, and I'm a really picky guy when it comes to hardware. I'm using two pairs of these for some very heavy, and thick cabinet doors faced with antique barn wood, and they are going to do the job oh-so-well. I've never ordered from Homebuilder's Hardware before, but you can be certain I will be doing so again."

Any customers interested in learning more about Homebuilders Hardware and the hardware they provide can visit their website. Anyone specifically interested in purchasing door closers can find them here: <https://www.homebuildershardware.com/product-category/door-closers/> The company also has representatives available to answer questions in case someone needs to contact them at 1-888-737-6515. Regardless of the kind of property someone needs to install door hardware on, Homebuilders Hardware has the necessary hardware available on their newly redesigned site.
