

Vitamin D3 - 5000 IU Released Amidst Findings About Problems Involving Vitamin D Deficiency

December 17, 2015

December 17, 2015 - PRESSADVANTAGE -

AdvantaVita, a business in Deerfield Beach, FL, has recently released its vitamin D3 5000 IU product to address potential health problems related to vitamin D deficiency. For instance, a research study has found that having low levels of the vitamin may lead to fractures in healthy, active individuals. Another study has found that RDA levels for this vitamin may have been set too low, which implies that people who believe they are supplementing to the right levels may still not have enough vitamin D. AdvantaVita has ensured their vitamin D3 5000 IU contains higher levels of vitamin D, enabling people to always have the right amounts of the vitamin.

"Researchers in Canada revealed that RDA levels are likely to have been set too low," says Chris Johnson from AdvantaVita. "A petition has been launched asking the RDA guidelines to be reevaluated. We fully support this petition and hope answers will be given soon."

AdvantaVita is pointing to a number of significant pieces of research that have shown the dangers of vitamin D deficiency. The World Health Organization's International Agency for Research on Cancer has stated that it was hypothesized by 1990 that the main cause of breast cancer is a vitamin D deficiency. This is supported

by statistics from the fact that those who live closest to the equator, where there is sufficient sunshine to enable the body to absorb vitamin D naturally, have lower chances of developing breast cancer, as well as other types of cancer.

The AdvantaVita vitamin product has been very positively received. They encourage anyone to "I am a working mom and always on the go. I can't afford to slow down or get sick," says one customer. "I usually buy generic cheap vitamin D3 because it is all the same right? Wrong. After I tried AdvantaVita Vitamin D3 5,000 IU I now feel ever better and know what I have been missing. I am very fair and pale and burn when I go out into the sun. I know that I need vitamin D in my life, just not from the sun unless I want to get burned. With AdvantaVita Vitamin D3 I wake up in the morning and take one and I feel great all day. My skin looks great. It goes down smooth and even my husband is now taking it. I would recommend anyone to buy this product."
