MicroLabors Launches Their New Standard And Customized Affordable Stock Photos

January 11, 2016

January 11, 2016 -
Getting a website enriched with high quality images, or using engaging images for the PPC ads, or using it as a background image, is what one requires to make all of it look engaging enough to attract visitors. MicroLabors has been providing high quality and unique images for all such purposes at very low cost. Adding on to its database of high quality cheap stock photos, the company has launched its new range of standard and customized stock photos and services for adding them to their client?s webpages, articles, and more.

As told, the company is offering these images for its clients, especially for those who are on a budget. ?Stock images with quality are critical for website publishers as well as advertisers online. Their web pages and posts are significantly enhanced by high quality stock photos, for the PPC advertisement campaigns, different eye-catching images adding in the banners make the ads stand out,? Eric Cheung, representing MicroLabors, said while discussing the importance of such images.

Talking about their newly launched cheap stock photos, he said that these stock images are again of a very high quality which can be searched for and downloaded from ShutterStock and iStock galleries of theirs. ?We make sure that there are no compromises with the quality of the images,? he said. The newly launched images are available with and without vector illustration.

The company offers world?s largest photo store with over 10,000,000 copyright-free images. ?Our images are available in HD as well as in ESP file format, and there is no need for any minimum purchase or subscription,? the company representative informed. Customers need to select the image or images they need, send the URL of the picture and that image will be sent over to them. The company also provides an option where the images can be sent over in a customized form as per client?s requirements.

As Eric said, ?We want to provide our clients with the best possible services, high-quality images and flexibility to customize these images as per their choice.? With adding new high quality cheap stock photos to their huge image database and by giving them the option to customize the images, the company has

provided enhanced options for their clients to choose from.
