Ahwatukee Window Tinting Company Offers Advanced Tinting And Detailing Services

May 11, 2020

May 11, 2020 - PRESSADVANTAGE -

Phoenix, Arizona based D.I. Auto Care is proud to announce that they provide the motoring public with the latest in car window tinting technology. The company states that they have a wide range of window films that reduce solar heat and glare, improve driver's comfort, enhance privacy, and add visual appeal to all types of cars.

As noted on the company's website, D.I. Auto Care's Ahwatukee Mobile Window Tinting services also come with a lifetime warranty in order to guarantee excellent workmanship and the use of quality window films. Paul from D.I. Auto Care, says, "We offer the latest in window tinting technology that effectively blocks more than 99% of the UV rays and over 80% of the infrared heat, protecting you and your passengers while also prolonging the life of your vehicle's interior. We also take pride in using quality window films from leading manufacturers that are backed up with a lifetime warranty for your added peace of mind."

In addition to UV protection, window tinting provides a number of other useful benefits. Tinted windows not

only increase privacy but also keep valuables safe from thieves, for instance. Such films also reduce heat absorption, making the car cooler during the summer season, which helps car owners to save on gas by using less air conditioning. They minimize eye strain by reducing the strong glare from the sun as well, which makes it easier to drive. Furthermore, window film helps hold glass together in the event of window breakage, whether from an accident or an attempted break-in.

Paul asserts that D.I. Auto Care's Ahwatukee Window Tinting film can keep shattered glass intact, preventing shards from causing damage to the skin and eyes. He states that they apply a thin film on the surface of the glass that effectively lowers the likelihood of the glass splintering, thus lowering one's risk of injury.

On the other hand, Paul highlights the importance of hiring a professional auto detailing company that offers high grade window film and quality tint application. He explains that, while DIY kits are often used as a way to save money, low grade tinting materials and poor application can prove to be much more trouble than they are worth in the long run. A professional window tint installer uses higher grade films that are backed by a comprehensive warranty. In addition, professional window tinting companies like D.I. Auto Care are well versed with the local rules and regulations when it comes to window tinting.

Dark windows are considered a safety concern. That's why many cities have specific requirements on how dark you can tint your car windows. D.I. Auto Care only supplies and installs window films that are compliant with the local tinting regulations, so you can rest easy knowing that you will not be flagged by law enforcement officers," says Paul. Moreover, the process of window film application is a very tedious process. For first timers, window films are generally difficult to work with since they easily crease, produce air bubbles, trap dirt, dust, and other debris. Furthermore, it is more economical if the window tinting job is done correctly the first time. Removing a window film is much more difficult than applying it due to the sticky adhesive in it. Paul advises car owners to avoid wasting money by doing a failed DIY installation and let the professionals do it correctly and effectively.

D.I. Auto Care is a trusted car detailing company that offers a wide range of auto services, including interior detailing, leather cleaning, seat stain removal, waxing, polishing, window tinting, windshield repair, and more. The company also prides itself in providing quality workmanship and excellent customer service. In fact, they boast a number of glowing customer reviews both on both the Yelp and Google review platforms.

Edward Brice, in a 5-star Google review, says, "I had Paul come out to replace my front windshield, and I realized he also does window tinting. I had him put the strip along the top of my windshield and tint the whole car while he was here. Amazing service and excellent quality of work. I was referred by a friend of mine who has been using Paul for over 20 years. I would highly recommend Paul and his services."

Complete details can be found on the company's website. Those searching for "Mobile Window Tint Near Me" in Phoenix, AZ may connect with D.I. Autocare via social media to stay up to date with their latest news and important announcements as well.
