

Excel Builders Renews Dedication to Providing Energy-Efficient and Green Home Building Services

March 05, 2020

March 05, 2020 - PRESSADVANTAGE -

Fenwick Island, Delaware: Excel Builders has announced a new set of green home building services for clients in Delaware and Maryland. The rollout of new services is part of Excel's continued dedication to providing high-quality home building services that are sustainable, energy-efficient, and environmentally-friendly.

The central element of Excel's commitment to eco-friendly homes is their use of Insulated Concrete Forms (ICF). This material lasts for decades and significantly cuts down on energy use indoors.

New and related services also include: The most efficient modern heat pumps and systems; Fresh and clean airflow direction; Water purification system installation; Energy-efficient window glass.

This new set of services offers a way for clients in the service area to have homes built or renovated with energy and the environment in mind.

Excel provides custom home building and other services in cities throughout Delaware and Maryland, with

their main office located on Fenwick Island.

Features and benefits of our services include: The best home warranty in the industry. It fully covers one year of workmanship, two years of mechanical systems, and ten years of structural protection; Analysis from former NASA engineers to calculate an estimated monthly heating and/or cooling costs for one's home, based on construction and climate; 70% greater energy efficiency using ICF when compared to average home building methods, plus additional efficiencies using recommended systems and home designs.

The full set of green home building services from Excel Builders is available to all clients effective immediately.

Prices will range depending on the exact nature of a client's home building project and what specific services they choose.

About Excel Builders

Excel Builders was formed in 2004 by Stephen Doyle as a sister company to Stephen C. Doyle Construction as a specialized home building company. Specifically, Excel Builders focuses on building energy-efficient homes and commercial buildings using sustainable methods and materials.

President Stephen Doyle places a personal focus on each project to ensure it is customized to the needs of each client. He can be seen at the project sites from the beginning through the end.

In addition to home building, Excel also offers services for renovating an existing home to become more energy-efficient and sustainable. Services range from consultations on materials and systems being used in a renovation, to completing projects directly.

Contact Excel Builders for more information at 302-727-0769. Three locations are spread throughout Delaware, with one location in Maryland.
