

Fleet Cost & Care Provides Fleet Management Software For Companies

May 19, 2020

DETROIT, MI - May 19, 2020 - PRESSADVANTAGE -

Fleet Cost & Care, a Detroit, Michigan based fleet management software company, is reaching out to the wider community to announce that they are providing operations management software for fleet and heavy equipment rentals. Since the company's founding in 1993, Fleet Cost & Care has been serving the heavy equipment industry across the globe, North America, Australia, New Zealand, Africa, the Middle East and the Caribbean.

The software provided by Fleet Cost & Care enables companies to improve internal operations by providing a centralized system that speeds up invoicing, streamlines payroll and ensures safety and success. Their innovative solution eliminates duplicate data entry while maximizing fleet and personnel efficiency as well as profitability.

Fleet Cost & Care's main product is NexGen, a desktop fleet management program that is designed to save time, improve accuracy, ensure safety and increase revenue. Jeff Curran, President of Fleet Cost & Care, says, "NexGen is designed by fleet owners, for fleet owners, to help heavy equipment rental companies operate more efficiently. This means that it takes into account every facet of fleet management

there is. In NexGen, you can easily quote and schedule jobs, add or remove equipment, view daily, weekly, or monthly schedules and perform all of the back office administrative tasks required by your business. If you integrate NexGen with your accounting system, what you'll have on your hands is a complete, comprehensive tool that eliminates the need for any other system.?

In addition to fleet management and concrete pump software like NexGen, Fleet Cost & Care also has a mobile application, Atom, that allows fleet managers and their teams to efficiently navigate the complex challenges and liabilities associated with operating heavy equipment. Fleet managers can easily check in with their fleet no matter where they are and ensure that their employees are performing their work efficiently, safely and without liability. The company says that Atom will help employees be more efficient with safety checklists, job signatures, labor entry, routing and so on.

Curran says, "Our software solutions and our highly skilled staff are the cornerstone of our business. Every day, we strive to deliver expert advice, informative training, modern industry solutions and world class support to meet the challenges of a wide variety of businesses. We are committed to improving our clients' daily operations. As such, both NexGen and Atom have been designed with extensive quoting and reporting capabilities, and they are able to speed up both invoicing and payroll as well as ensure safety and success throughout every aspect of fleet management.?"

The thoughtful design and effectiveness of the software provided by Fleet Cost & Care has allowed the company to become one of the leading providers of fleet management software in the world. Erika Sims from Sims Crane & Equipment praises Fleet Cost & Care, saying, "Fleet Cost & Care was the only system that had 180% of what we needed. It was never a question to us whether or not this became an option?it was the best decision for the future of our company.?"

Fleet Cost & Care is affiliated with the JJ Curran Crane Company and, as such, benefits from over 65 years of experience in the heavy equipment industry, especially in the area of fleet-related ownership. The company's team consists of many industry experts and insiders who have spent years working in the crane and rigging industry. Fleet Cost & Care is proud to say that they have been at the forefront of changing the ways crane and rigging as well as heavy equipment rental companies manage their fleets and streamline operations for over 25 years. Currently, the company's software is being used by 40 of the top 100 crane companies listed in American Crane & Transport's Top 100 list.

Those who want to learn more about Fleet Cost & Care and the various services they provide or have been looking for reliable fleet management software companies can find more information on the company's website. Additionally, the company encourages interested parties to get in touch with Jeff Curran directly via

email or phone. They can also be reached through the contact form on their website. In addition to their website, Fleet Cost & Care maintains a presence on Facebook where they frequently post updates, share related media and communicate with their customers.
