

Naperville Roofer Says Summer Is the Right Time to Take Care of Repairs and Maintain the Roof

June 10, 2020

CAPE CORAL, FL - June 10, 2020 - PRESSADVANTAGE -

Naperville Roofing & Construction, a roofing services company based in Naperville, Illinois, is encouraging homeowners and other property owners to consider scheduling the maintenance or repair of their roofs this summer. The Naperville roofer wants to emphasize that summer is the right time to handle those necessities so that they will have peace of mind knowing that their roofs are sturdy and will likely protect the home when the storms come. Furthermore, they are offering discounted rates and short scheduling time as a way to encourage people to have their roofs done during the summer.

James Kucharz, President of Naperville Roofing & Construction, says, "Summer is just starting and we believe it is the perfect time of the year to have the roofs inspected so that repair and maintenance services can be provided if necessary. It is certainly inconvenient to find that your roof has leaks when the storms come. Although we are always ready to provide emergency service 24/7, we encourage you to have your roofs maintained and repaired this summer and take advantage of our discounted rates."

Naperville Roofing & Construction has more than 25 years of experience when it comes to installing and fixing roofs. For roof restoration and maintenance, they offer GacoFlex silicone coatings from Gaco Western.

This has several advantages. First of all, the silicone material is permanent and it will not degrade, crack or chalk due to UV rays. Second, the silicone creates a seamless membrane that can withstand permanent ponding water. Third, the silicone coating process can help the homeowner save more than 33 percent of the cost of a new flat roof. Also, the total cost will be tax deductible as an expense in the year that it was completed.

They also offer metal roof solutions, such as the Standing Seam copper roof, which will be coppery bright when new and later on it will gradually assume the familiar blue-green color or patina. Copper roofs offer the primary advantage of being able to last for a century or more.

And for those who prefer it, Naperville Roofing & Construction may also install asphalt roofs. They are a GAF certified roofing installer. As such, they can install GAF shingles, such as the Timberline® Prestique® High Definition® shingles. These GAF shingles do not just offer a practically priced and architecturally stylish roof, but the Dura Grip® adhesive will seal each shingle tightly, thus, minimizing the possibility of shingle blow-off. They also offer asphalt shingles from IKO, such as the Cambridge shingle, which combines a unique shake-like design with superior protection. Cambridge shingles are also algae resistant and they also come with a limited lifetime warranty and a limited wind warranty of up to 110 mph.

And aside from roofing, Naperville Roofing & Construction also offers siding installation or repair. They can install a complete line of wood, cement, and vinyl siding. Fiber cement sidings provide the homeowner with an attractive home that is also protected from accidental and environmental wear and tear. The James Hardie fiber cement siding can last a lifetime as it is capable of resisting cracking, hail damage, rotting, termites, and many other potential problems. Meanwhile, vinyl sidings are the most popular choice either for home remodeling or new construction because they can provide the warm and quality appearance of wood while offering the advantages of not peeling, rotting, or splitting. Furthermore, its color will never fade away and require scraping, staining, or painting, unlike for wood sidings.

Naperville Roofing & Construction also offers rainware system components that will effectively channel the water running off the roof. One example is the Leaf Relief® gutter protection that allows the water to flow freely while any debris like leaves, pine needles and twigs are prevented from getting into the gutter.

Homeowners and other property owners who want to have their roofs maintained and repaired may want to visit the Naperville roofer's website, or contact them through the telephone or via email. Those who want to know the Naperville Roofing & Construction location may want to check out their Google Maps page. They are open from Monday to Friday, from 7:00 am to 5:00 pm.
