

Kansas Heating & AC Installation Experts Launch New Website

June 12, 2020

June 12, 2020 - PRESSADVANTAGE -

Lenexa, Kansas based Dillon's Heating and Cooling is reaching out to the community to announce that they have just launched a new company website. This online portal will serve as an additional resource that the company's customers may refer to when they require Dillon's Heating and Cooling's assistance.

This new platform improves on features that were already present on their previous site, making it easier for visitors to navigate and find what they need. The company decided to refurbish their old website once it became clear an upgrade was necessary to maintain their high standard of customer service.

"I am very pleased to announce the launch of our brand new website," states Jeff Dillon of Dillon's Heating and Cooling, adding that the company expects the platform to be a valuable tool for their customers. The main goal, he explains, was to develop a site that made their customers' lives easier and displayed all of the information that they needed in a clear, easily digestible manner.

The company extends an invitation to the community to visit their new website. Here, they can find information on Dillon's Heating and Cooling's services, working hours, areas of coverage and even a brief glimpse into the company's history.

The services that Dillon's Heating and Cooling offers include furnace and air conditioning repair, maintenance and replacement. All of these services are carried out by highly qualified and experienced professionals, guaranteeing the quality and durability of any job carried out by the company. According to Dillon, this expertise is often used to provide advice and guidance to their customers, as they always attempt to troubleshoot a customer's issues before dispatching a team for a service call.

Dillon says, "During the first call with any prospective customer, we always try to solve the problem over the phone in order to help save time and money. This means walking our customers through some of the most common and easily rectifiable issues within their HVAC system, directing them on what to look out for. If we are unable to find a solution, we will schedule a service call to come to your residence or business to

diagnose the unit and give repair recommendations."

Dillon's Heating and Cooling takes pride in being transparent with the costs of their services, offering upfront, flat rate pricing with no hidden fees. Their costs range from \$79 for service calls within business hours to \$89 for emergency after-hour or weekend service calls. For any emergency repair carried out during holidays, the company charges \$109.

Due to the current circumstances regarding the COVID-19 pandemic, the local air conditioning repair experts state that all of their service calls are no-contact, in compliance with CDC guidelines. Additionally, they are giving out free hand sanitizer units following the completion of any service call, helping the community stay safe during these pressing times.

Dillon's Heating and Cooling possesses several customer reviews that attest to the excellence of their services and the outstanding attention to detail they show each of their customers. On the Google platform alone, the local company enjoys a perfect 5-Star review rating. This places them among the top HVAC experts in the area.

One of their most recent customer reviews, shared through this space by Jonathan Burkett, says, "Jeff was awesome and super professional. Took his time to pass some knowledge onto me and was very friendly. I have already signed up to continue yearly service going forward. I would suggest this company to anyone looking for heating and cooling work."

In another comment, Rachel B. says, "Jeff and Rigo were very professional and great at explaining what I didn't understand or had questions about. They came out to give me an estimate last week and had one of the best prices in town, not to mention they scheduled me in very quickly to replace my old air conditioner. I would highly recommend Dillons Heating and Cooling!"

The company's website offers more details on Dillon's Heating and Cooling as well as their services. Interested parties may reach out to Jeff Dillon to follow up on any further inquiries. They may connect with the company through their official social media pages as well.
