

SeeBeyond? Medicine Launches E-Commerce Site Featuring Its Highly Sought-After Weight Loss Supplement, My Weight

June 18, 2020

June 18, 2020 - PRESSADVANTAGE -

Scarsdale, NY ? June 10, 2020 ? SeeBeyond? Medicine, the internationally renowned Functional Medicine practice founded by Joon Lee, MD, announces the launch of its E-commerce site, www.seebeyondshop.com, to better serve clients located beyond the medical center?s Westchester County, New York, home base.

A triple board-certified physician, specializing in Family Medicine, Integrative and Holistic Medicine and Obesity Medicine, Dr. Lee?s lifetime passion is finding the root cause of what is making people sick or gain weight. She has guided thousands of patients to achieve their optimal wellness and weight loss goals. To do so, she and her team have spent a decade developing nutritional and weight loss formulas that successfully treat the underlying reasons behind many health conditions, including obesity.

?Forty-two percent of American adults, nearly 80 million people, are suffering from this epidemic, and what people don?t realize, is that obesity is a disease that starts many diseases,? says Dr. Lee. ?One of our

primary goals is to help end obesity in America..?

Dr. Lee formulated the natural supplement My Weight to tackle multi-faceted barriers to weight loss. These include controlling appetite, boosting metabolism and energy, as well as improving mood and sleep, two critical factors that other formulas on the market simply do not address. My Weight contains ingredients such as pyridoxine B6, B12, Green Tea, Ciccus, L-theanine and SAM-e, which are all safe and effective, making it a positive alternative to popular prescription and OTC weight loss medications which could pose serious cardiac side effects.

Besides obesity, SeeBeyond's extensive supplement line includes formulas for detoxification, skin, joint, bone, energy, immunity, and gut health. All of SeeBeyond's high grade supplement formulas are non-GMO, Gluten Free and Dairy Free, use sustainable ingredients and packaging, and most importantly, comply with the FDA's Good Manufacturing Practices (GMPs) for safety and efficacy.

The SeeBeyond E-commerce site was designed to help patients utilize telemedicine services from anywhere in the nation. A complimentary initial consultation can be scheduled via videocall or a phone call. The next step involves diagnostic testing that can be performed in the convenience of one's home or work. Lastly, a personalized nutritional treatment plan is protocolled, and a personalized regimen of supplements arrives at one's door step every month.

To celebrate the launch of their E-commerce site, SeeBeyond Medicine is offering 10% off of their products. (promo code WINTEN).
