

Beauty IQ Med Spa Offers Botox, Fillers, and Thread Lift

August 19, 2020

August 19, 2020 - PRESSADVANTAGE -

Beauty IQ Med Spa, a medical spa in Spring, Texas, has announced that they are offering Botox, fillers and thread lift. They offer various kinds of injectables for aesthetic medicine applications and some of the most popular are Botox, fillers, and thread lift. Elizabeth Long, who heads the Beauty IQ Medi Spa team, is a family nurse practitioner and an advanced practice RN. She has more than 13 years of experience in reconstructive surgery and specialized plastics, and 30 years in aesthetics and cosmetology. She has been focusing on helping men and women manage the aging effects on their body and their skin.

Botox is a popular choice for people who want to regain their youthful appearance, particularly a smoother complexion. It is also a good choice for people who want to delay the signs of aging and decreasing the effects of the facial muscles on sensitive facial skin.

Elizabeth Long explains, "The benefits of BOTOX® at Beauty IQ include the: softening of existing wrinkles and facial creases; stalling of the aging process on some treatable regions of your skin; ability to leave the

individual looking refreshed and rejuvenated; ability to stop deep lines from forming when patients are expressing themselves, such as when they are frowning or laughing; the fact that it is a safe and effective treatment with long-lasting results that can be maintained over time; and the fact that proper injection techniques create natural and beautiful looking results that people desire.? Those who would like to learn more about Beauty IQ Medi Spa and their services may want to follow their Facebook page.

Beauty IQ Medi Spa also provides dermal fillers, which are injectable treatments that can restore the strength, volume, and vitality of the skin. These fillers may be used to smoothen those areas of the face that have lost volume, fill creases and deep lines to rejuvenate the patient?s look, and smooth away fine lines.

Depending on the formula of the gel that is injected, each dermal filler will work in different way to bring back the volume and vitality of the treated area. There are three basic categories of dermal fillers used at the medical spa. These are: hyaluronic acid-based dermal fillers, such as Restylane and Juvederm; Radiesse, which makes use of phosphate and calcium to help increase collagen production; and poly-L-lactic acid-based dermal fillers like Sculptra, which are designed to stimulate collagen growth for the long term.

Meanwhile, PDO thread lifts are offered at Beauty IQ Medi Spa as a non-surgical alternative to conventional facelift surgery. This procedure involves putting special thread made of polydioxanone (PDO), which is a biodegradable material, underneath the facial skin. This thread is inserted using a specially designed and very thin tubular needle. Once the thread is placed underneath the skin, it anchors to the surface using tiny barbs, thus, lifting the skin and tissue to bring back the youthful look of the patient. This treatment requires less than an hour to perform and only needs a local anesthetic.

An additional advantage of the PDO thread lift is the body?s response to the thread, which is the production of larger amounts of collagen that provide a long-term skin-firming effect. The facial skin is restored, developing new tissue and strengthening of the skin. The result is increased elasticity of the facial skin and tissue, offering an enhanced tone and firmness. The collagen can also help in restoring the aging skin, making it thicker, more supple, and more youthful.

Those who would like to learn more about Botox, fillers, thread lift and other services provided by Beauty IQ Medi Spa may want to check out their website, contact them through the telephone, or via email. To know their exact location and other important information, people may also want to check out their GMB listing. They are open from Monday to Friday, from 9:00 am to 5:00 pm, and on Saturdays, from 9:00 am to 1:00 pm.
