

Dumpster Rental Bowling Green KY Company Launches Brand New Website

September 25, 2020

September 25, 2020 - PRESSADVANTAGE -

BlueStar Roll-offs, a dumpster rental Bowling Green KY company, is pleased to announce the launch of their new website. They are a progressive company that is always looking for ways to make getting debris removal more convenient for their residential and commercial customers. The new website helps accomplish this and more. This locally owned and operated company pledges to be open to doing even more changes in the future to make them the most convenient rubbish disposal services provider in Bowling Green and the surrounding areas.

The company spokesperson, Shaphan Miller, says, "You will find few companies that put as much emphasis on customer service as we do. Our staff is always very respectful when working with our customers and we are always willing to go the extra mile to make sure they have a pleasant experience when renting a dumpster from us. We are also a company that's not afraid to make changes when we come across a better way of serving our customers' needs. Proof of that is the fact that we were willing to totally redesign our website in an effort to make it easier for customers to get information on our dumpster rental products and get those dumpsters quickly to where they are needed."

Miller says that the highlight of the newly redesigned website is the added online booking feature. This new feature offers the ultimate in 24/7 booking convenience for their customers. He stated anyone in the Bowling Green area can conveniently schedule a dumpster to be delivered to their home or business at any time right from the comfort of their home or office. All a customer has to do is go to their new website's, click-on 'View Dumpsters and Book Online' at the top of the page, answer a few simple questions, and then choose a delivery date. The company spokesperson says that scheduling a dumpster delivery is really that simple when using their website.

The company spokesperson also talked about the layout of the new website and how easy it makes it for their customers to get right to the specific information on the company they are looking for. That was done by doing such things as simplifying the dropdown menu choices and making it easier for customers to quickly get to the company contact information that they need. It also discusses the fact that they have 12-yard,

20-yard, and 30-yard dumpsters available for rent and how much tonnage that each of these can hold. He added that the largest size of roll off dumpster that they have can handle a whopping 3-tons worth of debris. The website also talks about how they can provide dumpsters for roofers and contractors and other types of construction or trade specialties.

Miller states that basically anyone that has a project that involves junk removal or debris removal can benefit from renting one of their dumpsters. They are happy to work with anyone who needs help selecting the proper dumpster size and answer any questions that a customer might have as far as what's allowed inside their dumpsters. He also mentioned that they have skilled drivers who are adept at placing their dumpsters in tight spaces so their customers can spend less time walking to and from the dumpster.

More information on this progressive dumpster rental service can be found on their website or by going to their Facebook page here at <https://www.facebook.com/bluestarrolloffs>. Their Facebook page is not only filled with helpful information but they also have many photos there that show how good they are when it comes to doing their dumpster delivery and retrieval services. They service not only Bowling Green but also those in Russellville, Franklin, Auburn, and Lewisburg. Those outside of these areas are encouraged to give them a call because they often can make special arrangements to take care of their dumpster rental needs too. Miller also wanted to emphasize that they are an environmentally responsible company when it comes to disposing of the debris that has been collected in their dumpsters.
