The Youth Fountain Offers Trusculpt Non-Invasive Body Sculpting

October 12, 2020

October 12, 2020 - PRESSADVANTAGE -

The Youth Fountain, an aesthetic medicine practice in Freehold, NJ, has announced that they offer truSculpt iD, which is a body sculpting treatment that makes use of non-invasive monopolar radiofrequency energy to heat up and destroy fat cells. The radiofrequency energy also helps in tightening the nearby skin, resulting in firmer and smoother appearance in targeted areas. It has six treatment panels that enable the most customized treatments that are tailor-fitted to the body's specific requirements without additional treatment time.

Dr. Emil Shakov, MD, FACS, at The Youth Fountain, says, "We are thrilled to provide this advanced body contouring technology because it's highly customizable and efficient, treating multiple areas of the body simultaneously in one 15-minute treatment."

It is also important to note that there will be no side effects or downtime after treatment with truSculpt iD. This is because it targets lax skin and unwanted fat cells without causing harm to the neighboring tissue. And

patients may begin noticing improvements as early as six weeks after the treatment, with continued improvements for up to 12 weeks.

It can be used on any area of the body where it is needed. Its six treatment panels may be able to decrease the fat and firm the skin on the abdomen, upper arms, thighs, chin, back, and more. And the number of treatments will depend on the patient's own unique goals and body contours. Those who would like to learn more about the aesthetic medicine practice and the treatments may want to follow their Facebook page.

The Youth Fountain also offers other treatments. For body contouring, they also offer CoolSculpting and EmSculpt. CoolSculpting is at the present the most popular and proven non-invasive treatment for fat reduction. It has also been cleared by the FDA and it has helped millions of people all over the world to get slim and get rid of stubborn fat bulges without surgery or downtime. CoolSculpting may help decrease fat in various areas, including the: double chin, muffin top, love handles, upper arms, inner and outer thighs, underneath buttocks, and bra fat.

Meanwhile, the EmSculpt is the world's first non-invasive buttock toning procedure but it can also be used for the abdomen and stomach, aside from the buttocks. There are number of advantages offered by EmSculpt, including: fast treatment times, no lengthy recovery or healing process, no invasive surgery pain, and great results without the risk or pain. It works by stimulating muscle contractions using technology.

The Youth Fountain also offers the hCG weight loss plan. hCG is the pregnancy hormone and when it is used in conjunction with a reduced-calorie diet, it has been observed to help in fat burning, reduction of inches, and a more sustainable weight loss compared to just using a reduced-calorie diet. hCG may be taken as a self-administered daily injection as prescribed by Dr. Shakov.

The Youth Fountain also offers Botox®, Dysport®, and Jeuveau® injections for smoothing lines and wrinkles on the upper portions of the face, including between the brows, the forehead, and around the eyes. They will help the patient in determining which injectable will be the most suitable for their needs.

In addition to the injectables, they also offer dermal fillers, which are injectable medications for the purpose of plumping up the areas of treatment. At The Youth Fountain, they use Versa®, Restylane®, or Juvederm® to help in plumping the lips, softening facial creases, removing wrinkles and improving the look of recessed scars. In contrast to Botox, which relaxes the tiny muscles in the face, dermal fillers will work by immediately volumizing the area where they are injected to. They can be used at the corners of the mouth fill nasolabial folds, treat a downturned smile, reshape chin lines, smooth out smokers lines around the lips, fill in the tear troughs, add more definition to the lips, and more.

Those who are interested in learning more about truSculpt iD and other treatments available through The Youth Fountains, may want to check out their website, or contact them on the phone or through email. They may also want to check out their Google Maps listing. They are open from 9:00 am to 5:00 pm, from Monday to Friday.
