

Portable Diaper Changing Kit Has Wrist Strap Announces 3 Bees & Me

September 08, 2015

September 08, 2015 - PRESSADVANTAGE -

3 Bees & Me, an online-based baby products company, announced earlier that they have included a wrist strap on their Portable Diaper Changing Kit. The wrist strap makes the clutch easier to bring especially on short trips. Moreover, it can also be securely attached to baby strollers for convenience.

"We are proud to share to everyone that we included a wrist strap for our changing pad station with Chevron pattern design. We believe that this is important because the strap makes the clutch easier to carry," says 3 Bees and Me spokesperson, Holly James. "Also, we know that most of our customers use strollers, so we made sure that it has a strap that can easily be attached and secured when you and your baby are out and about. For us, aside from quality, we also want to give you convenience."

This diaper changing pad has become popular due to many reasons, one of which is the amount of positive reviews that it has been getting from customers. In one review by Sandy Brandon, she stated, "The pad itself is extremely cute and fashionable. It folds out large enough that it easily fits the baby and yet it is small enough when you fold it back up that you can carry around with you for quick trips to the store, mall, etc. It has a little area that you can hold it as a wristlet, attach it to the stroller for longer trips, and yet still small

enough that you can throw it in the diaper bag, without adding a lot of weight to your bag. I love this Changing Pad!! Great for any new mom or even as a gift for a Baby Shower!?

3 Bees and Me's diaper station is very easy to clean and sanitize because it is made from a good quality vinyl material. It includes several compartments to accommodate diapers, wipes, baby clothes and other baby essentials. Furthermore, it has a mesh pouch that is secured by Velcro. For more important items such as keys or money, there is a zippered front pocket that can be used. The pad itself is made of the same vinyl material used for the clutch. It is large enough conveniently protect the baby from dirty surfaces. The wing design of the pad is unique for this type of product.

When it comes to pleasing customers, ease of use is as important as quality. This may be the main reason why the company included a wrist strap that can also easily be attached to strollers since their target market mostly consists of parents. It is still available at amazon.com.
