Fleet Cost & Care Offers Environmental Fleet Management Software

October 14, 2020

DETROIT, MI - October 14, 2020 - PRESSADVANTAGE -

Fleet Cost & Care, a company based in Detroit, Michigan, has announced that they provide environmental fleet management software to help environmental cleanup fleet owners. The NexGen and Atom fleet management software can make environmental cleanup fleet ownership and management easier. With this software, it is possible to track each unit, every time it has been used, serviced or damaged. It can also be utilized to track all of the environmental safety regulations and compliance documentation needed within the system. And the technicians can use the mobile app for capture any required data.

NexGen and Atom, the fleet management software and its mobile app from Fleet Cost & Care can also be used for other industries. These include crane and heavy equipment rentals, excavating and earth moving, construction, concrete pumping, and commercial vehicle fleets. The fleet management software offered is for any size company that wants to streamline scheduling, quotes, accounting, maintenance, and more. Data flows through the system through step-driven process in every department of the company.

The NexGen and Atom software are not just simple dispatch software but provide a comprehensive fleet operations system. The software offers a number of benefits, such as: the elimination of standalone systems;

proven mobile solution that is easy to use; comprehensive reporting and forecasting; and the presence of a team of industry experts ready to help.

With the elimination of standalone systems, companies would be able to enhance data accuracy, save time, and boost profit margins. Through the simplification of how work is done, greater productivity can be achieved across all departments. Meanwhile, the Atom mobile app allows field managers and field workers to enter work orders, create quotes, schedule and monitor jobs, make entries for payroll, conduct safety inspections, and more, from any device, such as smartphones, tablets, or the desktop computer.

Comprehensive reporting and analytics through the Fleet Cost & Care software allows business owners and managers to make smart decisions and share their insights throughout the organization. The software's suite of dashboards, reports, and forecasting tools are the most powerful component of the fleet management system. Its database can also be integrated with Microsoft Power BI to allow users to visualize the data using interactive live dashboards.

And finally, Fleet Cost & Care has a team of industry experts and fleet management consultants, including former dispatchers, accountants, crane operators, and service department managers. Their management group has decades of ongoing experience in fleet ownership and they are committed to the industry and their customers.

The NexGen fleet management software is designed to help heavy equipment rental companies systemize and simplify their daily operations. The system is designed to help with various tasks, from quote and scheduling jobs to invoicing customers and doing payroll. The software allows the company to reduce the time that is spent on administrative tasks and increase the time spent on those tasks that generate revenue.

Atom is the mobile app version of the fleet management software that allows managers to check in with their fleet wherever they are. Whether they are on the job site, at the office, or on vacation, they would be able to ensure that employees are doing their work safely, efficiently, and without liability.

The Atom mobile fleet management app offers a number of benefits. These include remote tracking of all aspects of the fleet; quick creation of quotes and work orders; ability to easily assign and monitor work crews; the use of electronic safety checklists; and the ability to sign documents electronically for authentication. E-signatures may be used for contracts, payroll, invoices, work orders, and other documents that require signatures.

Jeff Curran, President of Fleet Cost & Care, says, "We serve businesses of all sizes in the crane & rigging and heavy equipment industries. Our software enables companies to improve internal operations by providing a centralized system that simplifies the way information flows through their business. NexGen and

Atom users experience increased productivity, saving time and money.?

When in need of fleet management software, owners of environmental cleanup fleets and other heavy equipment industries may want to check out the Fleet Cost & Care website, or contact them on the phone or via email.
