

New Retainer Cleaner Kit by Soak & Smile Launches on Amazon

January 26, 2016

January 26, 2016 -

Sanford, FL - Monika?s Marketplace has added another product to their product line, a dental appliance cleaner kit by Soak & Smile, that comes with a sturdy brush, wash box and 30-day supply of cleaning tablets. This kit can be used for many different dental appliances but has proven to be a popular item for cleaning retainers.

Soak & Smile also carries different variations of the retainer cleaner kit for those that may not need all the pieces that come in the kit. Soak & Smile also offers refile cleaning tables in packs of two as well as just the brush and the wash box packaged together. These different variations make it very easy for a customer to get exactly what they need.

This retainer cleaner kit has been compared to the popular Retainer Brite, although similar, many have commented that they do not like the chemical smell of Retainer Brite and prefer the unscented Soak & Smile.

The company states that the retainer cleaner kit is very easy to use by simply filling the wash box with warm water, dropping in one of the retainer cleaner tablets and then adding the retainer. The retainer can soak for about 5 minutes. If needed, one can use the included brush for extra cleaning.

?I got this retainer cleaning kit for my son and so far it?s great. It comes with everything that you need, which makes it very easy. Then you can just get refills for the tablets as needed,? said Jane, a happy customer.

?This product has been received very well from our customers. They love the convenience of having everything together in one package. And it does the job that it is supposed to do ? clean your retainers,? said Monika, a company representative.

Soak & Smile?s retainer cleaner kit, refill tablets and the wash and brush set can be found on Amazon.com.
