

U Guard Security Products Launches New Corporate Site

November 30, 2020

November 30, 2020 - PRESSADVANTAGE -

U-Guard Security Products, a Lebanon, Georgia-based provider of non-lethal self defense products, is pleased to announce the launch of their new corporate website. The company offers products that provide their customers with less lethal ways of protecting themselves without lethal damage to their assailants and also educates their community on how to use non-lethal self defense weapons. Some of the items available at U-Guard include stun guns, tasers, pepper sprays and so on. The company is committed to helping their customers feel safer in every way.

"We believe everyone has the right to feel safe," says a representative of the company. "Whether you are walking home late at night or are in the relative safety of your home, there is always a chance that someone is around and looking to rob or otherwise harm you. Our goal is to make sure no American ever has to fear for their safety. We understand that a lot of people would rather not have a gun around the house, and shooting someone is not something the average person might be ok with, even if said person is attacking them. We offer ways to protect yourself without permanently ending someone else's life. With the proper self-defense equipment and the proper education, you will never have to worry for your safety or the safety of your loved ones again."

One of the most popular products supplied by U-Guard is the stun gun. Stun guns are used to immobilize an attacker, without causing serious injury, by delivering an electric shock. The use of stun guns is legal in most states in the United States. Only two states make it illegal to own stun devices (Hawaii and Rhode Island), and many states that once restricted the ownership of stun guns have updated and changed their laws over the years.

U-Guard has a list of rules surrounding the use of stun guns by civilians. It is important to understand the difference between a stun gun and a taser, the laws surrounding both and how to handle one. State laws are generally quite similar regarding both stun guns and tasers. Stun guns are usually direct contact, non-lethal electric stun weapons that must touch the body to work. Tasers fire darts from a distance which administer an electric shock to incapacitate the attacker. In most states, one can purchase a stun gun without a permit. The laws surrounding the use and possession of stun guns generally come down to simply making it illegal to use one to commit a crime. [Click here for stun weapon laws.](#)

U-Guard Security Products is headquartered in Georgia, from where the company can offer quick and free shipping to customers all over the United States. Established in 2010, the company has been supporting the non-lethal self-defense, safety and security industries for nearly a decade.

"We are a growing family-owned business that truly understands the value, and importance of our customers that continue to support us," the company says. "Our loyal customers are the reason our company is growing, so we can continue to serve others with our expert knowledge and help you and your loved ones stay safe. We offer many name brand products, as well as our own brand of items when we are looking for a better quality product. We are a direct distributor to the consumer. We have removed the middle man so we can offer the best quality items, expert advice, customer service, product warranty and competitive pricing. When you buy from us, we offer free shipping on all US orders, with a limited lifetime warranty, great pricing and more, along with our customer satisfaction guarantee. We know a happy customer is the only customer."

At U-guard, one can find expert advice from the company's trained, experienced staff members, who are always ready to help customers make the right purchase. Every U-Guard product comes with a lifetime warranty and is thoroughly tested to ensure it works properly.
