The Youth Fountain Offers Laser Tattoo Removal Service in Freehold NJ

January 06, 2021

January 06, 2021 - PRESSADVANTAGE -

The Youth Fountain, a medical spa in Freehold, NJ, is pleased to announce that they can provide a laser tattoo removal service. They use Enlighten, which is the most up-to-date advanced laser system for the safe and effective removal of tattoos and benign pigmented lesions. This laser system employs pico technology that is capable of delivering much more laser energy at an incredible speed. The laser energy causes rapid thermal expansion that results in the break down of the tattoo pigment so that this can be absorbed and then excreted by the body with less discomfort, less chance of scarring, and less time needed for recovery compared to other treatment methods.

Dr. Emil Shakov, MD, at The Youth Fountain, says, "The Enlighten laser system emits extremely short and powerful picosecond laser pulses. The energy provided by this laser causes rapid thermal expansion that breaks down the tattoo pigments. And don't worry about pain because we will administer lidocaine to the specific area before the procedure to ensure that you will not feel any intense pain. There will just be some discomfort that patients have described to be the kind of feeling caused by a rubber band being snapped against the skin."

The number of treatment sessions needed will depend on the depth, color, composition, and size of the tattoo. Dr. Shakov can advise the patient of the number of treatments that may be required to get rid of a particular tattoo. And while most tattoos will totally disappear with the laser treatment, there may be some ink colors that tend to be more resistive in which some tint may be left. To really find out if the Enlighten laser tattoo removal system is appropriate, consultation with Dr. Shakov is recommended. More about the med spa can be gleaned from their Facebook page.

Dr. Emil Shakov, MD, FACS is a board-certified surgeon and has extensive experience and training regarding advanced surgical techniques, anti-aging, weight-loss, advanced aesthetics, and hair transplantation. He is also an expert in neurotoxins like Botox, Jeuveau, and Dysport that are used in injectables that can help in treating wrinkles and other signs of aging. These injectables can be used to help improve crow's feet, forehead lines, "bunny" lines, frown lines between the eyebrows, dimpled chin, gummy smile, and platysmal bands of the neck.

Dermal fillers are also available at The Youth Fountain and these are injectable medications that can also help with getting rid of signs of aging. However, instead of relaxing the tiny muscles in the face, they plump up or add volume to the areas of treatment. These can be applied at the corners of the mouth to treat a downturned smile, smoothen smokers' lines around the lips, fill nasolabial folds to treat smile lines, shape the lips, fill in the tear troughs to treat "sunken" eyes, add more definition to the cheeks, reshape chin lines, and treat brow lines.

They also offer body contouring treatments like CoolSculpting, EmSculpt, and truSculpt iD. CoolSculpting is a non-invasive fat reduction treatment that can eliminate fat almost anywhere in the body, including the double chin, love handles, muffin top, inner and outer thighs, upper arms, bra fat, and underneath buttocks. EmSculpt is the first non-invasive buttock toning treatment in the world and it can help in improving the buttocks, stomach, and abdomen. And truSculpt iD employs non-invasive monopolar radiofrequency energy to heat up and destroy fat cells, resulting in an average fat reduction of 24 percent. It can help to tighten the surrounding skin providing a firmer and smoother appearance in the targeted areas.

Those who are interested in knowing more about the laser tattoo removal service and other kinds of med spa services offered at The Youth Fountain may want to check out their website, or contact them through the telephone or via email. They are open from Monday to Friday, from 9:00 am to 5:00 pm. Those who want to know their exact location and other important information may want to take a look at their GMB listing.
