

Dr. Teresa Camden's New Medical Spa Is Offering Kybella Treatments For Getting Rid Of A Double Chin

January 06, 2021

January 06, 2021 - PRESSADVANTAGE -

New Medical Spa, aesthetic medicine & weight management clinic in Glen Allen, Virginia, is offering Kybella service for those looking to get rid of their double chin.

The clinic is run by Teresa Camden, MD, FACSMD, a leading Cosmetic Medicine practitioner with over 20 years of experience. Dr. Camden holds board certifications through the American Board of Family Medicine in both Family Practice and Sports Medicine and is a distinguished Fellow of the American College of Sports Medicine. The clinic also offers services such as Botox, JUVÉDERM, chemical peel, LATISSE, retinol & skincare, vampire facelift, body filler skin tightening, butt lift: Sculptra, weight loss medication, and B-12 injections for weight loss.

Kybella's main ingredient is a synthetic form of deoxycholic acid. This acid, which is found naturally in the body, is responsible for breaking down and absorbing fat. When the solution is injected into the body, the deoxycholic acid immediately starts destroying fat cell deposits. Once they're broken down, the cells can't

accumulate fat any longer. The results are permanent. As long as the recipient doesn't gain weight in the future, the outcome can last a lifetime.

Although Kybella jumps into action right away, it will take time to notice the results. This is because the system has to start by flushing away all broken down fat cells. The recipient should start noticing a dramatic effect in as little as three to four weeks, with optimal results surfacing around six to eight weeks. Since it will continue to break down and flush out fat, the recipient may continue noticing an improvement after the initial result.

Kybella is known for getting rid of that dreaded double chin and working to define the jawline. It is also beneficial for off-label treatments. Dr. Teresa Camden is one of the only practitioners in the Richmond area who offers treatments for other areas of the body. Dr. Camden offers to help anyone who has stubborn fatty deposits that make them self-conscious or uncomfortable about their appearance. Some clients even benefit from treatments in their upper arms, along their bra line, or in their buttocks. Potential customers can find out more about the treatment options by contacting the clinic directly through its Facebook page.

In most cases, patients need more than one treatment. A single treatment often involves getting multiple injections in the treatment area. Dr. Camden claims that she precisely knows where to inject Kybella so that it works best for the patient's particular needs. Although most recipients are probably going to notice an improvement shortly after their first session, most men and women need more than one treatment session. It's typical for clients to need two to four sessions, each scheduled about a month apart, to achieve optimal results. They can even safely receive up to six treatments if needed.

According to a review of the clinic's service by Marie H, "Dr. Teresa Camden is not only absolutely meticulous and skilled in her work, but she is the kindest most wonderful caring doctor that you will ever have. She inspires confidence and trust and the results of her treatments are instantaneous. I am excited and looking forward to continuing having her take care of my skin and seeing the progress of the positive results that I have begun to see! She's absolutely the Best!"

Another review by Jennifer D says, "Dr. Camden and her staff are incredibly amazing. Dr. Camden is very professional with a wonderful personality. I could not be more pleased with the services I have received. Dr. Camden makes you feel special and really boosts your confidence. There is nothing more beautiful than women with a glow of confidence and I thank her for that. I highly recommend Dr. Camden for your beauty needs, whether it's injectables or laser treatments to the other services offered. You can't go wrong with New Medical Spa."

The service has a rating of 4.8 out of 5 from over 90 reviews on its GMB listing.
