

PreciseGryp Tweezers Receive Rave Reviews

September 25, 2015

September 25, 2015 - PRESSADVANTAGE -

PreciseGryp, a business in Beaverton, OR, has announced that their tweezers with case flagship product is receiving rave reviews from customers. The product, which has only recently been launched, is selling very quickly and is fast becoming one of the most popular items on Amazon in its category. Details can be found at <http://www.amazon.com/Best-Tweezers-With-Case-PreciseGryp/dp/B00ZVEOUC>.

"When we released our tweezers, we knew they were of fantastic quality and would help people achieve the perfect eyebrows," says Keegan Allen from PreciseGryp. "To hear from our customers that they agree with this is wonderful and exactly why we are in our line of work."

The tweezers have been designed for professional precision, by using a twelve step process in their manufacture. Keegan Allen explains that this sets them apart from other tweezers on the market, which are often created using just a four step process. Because of this kind of manufacturing process, the tips are incredibly narrow but perfectly aligned and they are designed to stay sharp over time. This means tweezing would be quick, painless and very precise.

Customers have been commenting on how well the tweezers work. "The tweezers are of high quality stainless steel material and are feather-light," says RD. "The non-slip grip is really good. The tweezers work

perfectly well and gets even the finest hairs; which makes it a perfect for doing my eyebrows. The slant tip of the tweezers makes it easy to grip short or ingrown hair. I like that it comes with a beautiful pink carrying case; which is ideal for storing, traveling and keeps the tweezers clean! They are very easy to clean and the life-time guarantee ensures me of the quality as well as security on my purchase."

Thanks to the slanted tip, the tweezers can be used for a variety of different applications. While designed primarily for women to be able to shape their eyebrows, it can also be used as a first aid tool. By placing the slant tip up, tweezing is made very easy. Placing it down allows it to work on smaller things, such as splinters and ingrown hairs. Presented in a pink case, the tweezers are protected from damage.
