Watertight Homes Expands Property Preservation Services Across Yorkshire

November 10, 2025

Derbyshire, England - November 10, 2025 -
Watertight Homes Ltd, a Leeds-based property care specialist, has announced the expansion of its comprehensive preservation services throughout Yorkshire, addressing the growing demand for professional property maintenance in the region's diverse climate conditions.

The company, which has served Yorkshire families and businesses for over two decades, offers specialized treatments including damp proofing, basement waterproofing, woodworm treatment, and timber preservation across major Yorkshire cities including York, Leeds, Sheffield, Bradford, and Huddersfield. The expansion comes as property owners increasingly recognize the importance of preventative maintenance to protect their investments from moisture damage and structural deterioration.

"Yorkshire's varied landscape, from coastal areas to the Dales, presents unique challenges for property preservation," said Mathew Milner, Managing Director at Watertight Homes. "Properties in Robin Hood's Bay face different moisture challenges than those in Sheffield or Leeds. Our expanded service coverage ensures that every property owner in the region has access to specialized preservation solutions tailored to their specific environmental conditions."

The company's services address critical property care needs including basement conversions, cavity wall tie replacement, condensation treatment, and wet rot remediation. As a BBA accredited and Triton approved contractor, Watertight Property Care & Preservation Yorkshire backs all work with a 10-year guarantee, providing property owners with long-term peace of mind.

Recent industry data indicates that untreated damp and timber decay issues affect approximately one in five UK properties, with costs for remedial work significantly higher when problems are left unaddressed. The expansion of services across Yorkshire aims to help property owners identify and resolve preservation issues before they develop into costly structural problems.

The company's approach begins with comprehensive property assessments to identify potential issues before they escalate. Their team of specialists then develops customized treatment plans based on each property's specific requirements, whether addressing existing problems or implementing preventative measures.

Watertight Homes has maintained a 5-star rating on Which?, reflecting consistent customer satisfaction across its service range. The company's expertise spans both residential and commercial properties, with solutions ranging from simple damp treatments to complex basement tanking projects.

Established in 2000, Watertight Homes Ltd has built its reputation on providing high-quality, cost-effective solutions to property preservation challenges. The company specializes in diagnosing and treating moisture-related problems that can compromise structural integrity and pose health risks to occupants. Their services encompass the full spectrum of property preservation needs, from initial consultation through to completion and aftercare.

The expanded service coverage includes Wakefield, Ripon, Malton, Kingston upon Hull, and numerous other Yorkshire communities, ensuring comprehensive regional coverage for property preservation needs. The company's deep understanding of Yorkshire's unique architectural heritage and environmental challenges positions them to deliver effective preservation solutions tailored to local conditions.
