

Records Management Provider Awarded Bid for Charlotte Cooperative Purchasing Alliance Document Management Contract

July 23, 2021

Charlotte, North Carolina - July 23, 2021 - PRESSADVANTAGE -

Record Storage Systems, a leader in document and information management solutions, was recently awarded a contract to provide document management services through the Charlotte Cooperative Purchasing Alliance (CCPA). The contract was competitively solicited by the City of Charlotte on behalf of itself and local government, school districts, government agencies and non-profit organizations. Record Storage Systems was one of six companies to be awarded the request for proposal, in compliance with the competitive bidding laws in North Carolina.

The new contractual partnership with the CCPA enables Record Storage Systems to provide offsite document storage services, document scanning and digitization services, and document shredding services at a competitive rate, giving organizations who implement the services a cost advantage and significant return on investment.

Record Storage Systems has provided hard copy records management, digital conversion, and document destruction services to public agencies and non-profits since 1985 and has become a statewide leader in

record retention best practices and digitization.

“As a Charlotte-based company, we’re proud to support the CCPA and encourage agencies to participate in the contract. The cost advantages of partnering with a local, approved document management provider, along with our personal customer service and complete approach to information management, will help agencies reduce paperwork, save time, and remain compliant,” said Claude Mitchell, Vice President. “We share the CCPA’s mission to provide valuable solutions that align with our clients’ goals for secure records management.”

Participating public agencies will enjoy the benefits associated with Record Storage Systems’ offsite document storage solutions, which include a dedicated client web portal, advanced barcode tracking system, timely record retrievals and deliveries, as well as a scan-on-demand service. As part of the 3-year agreement, quotes for services will reflect the contracted prices as specified in the price schedule of the contract. The partnership enables agencies to utilize data management services that fit their budget, without sacrificing quality or data security.

About Record Storage Systems

Record Storage Systems is a privately-held data and information management solutions provider specializing on offsite record storage, document imaging, record destruction and electronic document management software. The company supports over 800 clients throughout North Carolina and South Carolina in their goals for secure, efficient, and reliable records management. More information about the company can be found at <https://recordstorage.com>.

About the Charlotte Cooperative Purchasing Alliance:

Charlotte Cooperative Purchasing Alliance (CCPA) is a cooperative purchasing program established by the City of Charlotte with the specific purpose of reducing procurement costs by leveraging aggregate purchasing volume to receive better pricing.

CCPA serves as a government cooperative purchasing organization for government agencies. All contracts are publicly solicited, awarded, and held by the City of Charlotte, North Carolina. CCPA contracts are available for use and benefit all entities that must comply with state purchasing laws (cities, counties, public and private schools, colleges and universities, non-profits, and all governmental entities). More information about the CCPA can be found at www.charlottealliance.org.
