

Keathley Landscaping Expands Yard Drainage Solutions for North Texas Homeowners

December 01, 2025

GARLAND, TX - December 01, 2025 -
Keathley Landscaping, a Dallas-based landscape contractor, has expanded its specialized drainage services to address the growing demand for professional water management solutions across North Texas communities. The expansion enhances the company's capacity to tackle complex drainage challenges that threaten residential properties throughout the region.

The expanded services come as homeowners increasingly recognize the critical importance of proper yard drainage solutions in protecting their properties from costly water damage. As a NDS Certified Drainage Contractor, the company now offers comprehensive drainage system design and installation alongside its established landscaping and hardscaping services.

"Property owners often underestimate the damage that poor drainage can cause until they face flooding or foundation issues," said Logan Keathley, owner and NDS Certified Drainage Contractor at Keathley Landscaping. "Our expanded drainage services provide homeowners with practical, cost-effective solutions

that protect their investments while maintaining the beauty of their outdoor spaces."

The enhanced drainage offerings include French drain installation, comprehensive grading solutions, channel drain systems, and custom-designed buried drainage pipes. Each system is tailored to address specific property challenges, from managing surface water runoff to preventing soil erosion and foundation damage.

Beyond drainage solutions, the company continues to provide its full range of outdoor services including natural and modern stonework, retaining walls, outdoor living spaces, and flowerbed borders. This comprehensive approach allows homeowners to address both functional drainage needs and aesthetic landscape improvements through a single contractor.

The expansion particularly benefits homeowners in Wylie and surrounding communities who have struggled with water management issues common to North Texas properties. Clay soil conditions, irregular grading, and intense seasonal rainfall create unique challenges that require professional expertise to resolve effectively.

"We approach each drainage project with a problem-solving mindset," added Keathley. "There's always a solution to even the most challenging drainage problems. It just takes the right combination of experience, technical knowledge, and innovative thinking to find it."

The company's drainage solutions integrate seamlessly with existing landscape features, ensuring that functional improvements enhance rather than detract from outdoor aesthetics. This approach has proven particularly valuable for properties requiring both drainage correction and landscape renovation.

Keathley Landscaping has served the Dallas metropolitan area since 2002, building a reputation for reliable, practical landscape solutions. The company provides services throughout North Texas, including Dallas, Allen, Frisco, Garland, McKinney, Plano, Richardson, Rockwall, and numerous other communities.

As a certified drainage contractor, the company follows industry best practices and utilizes professional-grade equipment to ensure long-lasting results. The expanded drainage services complement the company's existing offerings in sod installation, landscape lighting, fence repair and installation, patio covers, and tree trimming services.

The expansion of drainage services reflects the company's commitment to addressing evolving homeowner needs while maintaining its focus on quality craftsmanship and customer satisfaction. With over two decades of experience in the North Texas market, Keathley Landscaping continues to adapt its services to meet the

challenges faced by local property owners.
