Western Australia Company Launches New Rockingham Motorcycle Training Website

March 21, 2016

March 21, 2016 - PRESSADVANTAGE -

Bike Training WA, a company based in Golden Bay, Western Australia, has announced the launch of a new website www.http://biketrainingwa.com. The site is designed to provide information regarding the company's motorbike training Rockingham residents can make use of. Company spokesperson Lee Simpson states, "We specialize in scooter and motorbike instruction and our site is designed to make it easier to schedule a session."

The company states that they offer a more than 90 percent pass rate for those who take their courses, and have instructors with years of experience in riding as well as teaching motorcycle lessons. They say that they have designed their site to provide general information to those interested in learning to ride as well as to make it easier to schedule an appointment, join a class, and pay for lessons.

The Australian company provides all equipment, although riders can save on tuition fees if they bring their own Rockingham motorbike. Lessons are provided to those who are looking to obtain their LAMS, scooter or unrestricted motorbike licenses.

"We just want everyone to get a feel for what our lessons are like and how our instructors work, what they teach, and other general information about our courses," says Lee Simpson. He states that the main reasoning behind the launch of their new site is to offer bike riders a way to learn more about the company, in addition to making it simpler for them to book a lesson. All information about the classes, schedules, and instructors are offered on the newly designed site.

Simpson states that the company's goal is to help bikers have more confidence in their ability to pass their tests and to ride safely. Bike Training WA offers a number of different lesson packages, with times that range from one hour to an hour and a half per course, all of which are detailed on the new website.

Weekend lessons are also available for those who need more flexibility. More about the company including specific lesson times and more information about what the courses are designed to teach can be seen on their new website.
