Mountain Radiance Expands Medical Spa Location to Meet Growing Demand

February 17, 2026

ASHEVILLE, NC - February 17, 2026 -
Mountain Radiance has announced a significant expansion of its Asheville, North Carolina medical spa facility, more than doubling its office space to accommodate growing patient demand for aesthetic and wellness treatments. The expansion includes the addition of Suite 101, which will serve as the new primary entrance, along with three new treatment rooms and a dedicated photography space for documenting patient results.

The expanded facility reflects the increasing demand for comprehensive med spa services in the Asheville area, where patients seek advanced aesthetic treatments ranging from injectables and laser therapies to hormone replacement therapy and innovative skin rejuvenation procedures. The additional space allows the medical spa to enhance patient care while reducing wait times for popular treatments.

"This expansion represents our commitment to providing exceptional patient experiences while maintaining the highest standards of medical oversight," said Dr. Mark Chandler, Owner and Medical Director of the medical spa. "The additional treatment rooms allow us to serve more patients efficiently, while the dedicated photography space ensures we can properly document treatment outcomes in a professional, private setting."

The expanded facility maintains the full range of services that Mountain Radiance has become known for, including Botox and Dysport injections, Hydrafacial treatments, chemical peels, dermaplaning, and dermal fillers. The practice also offers advanced laser treatments including CO2 laser skin resurfacing, laser hair removal, and laser tattoo removal, alongside innovative procedures such as ProCell Microchanneling and RF Microneedling.

"The new layout enhances both patient privacy and comfort," explained Lauren Chandler, Practice Director and Certified Aesthetic Laser Operator. "Each treatment room has been designed with specific procedures in mind, allowing our providers to deliver specialized care in optimized environments. The dedicated photography space is particularly valuable for tracking patient progress and demonstrating the effectiveness of our treatments."

The expansion comes as medical spas nationwide experience increased demand for minimally invasive aesthetic procedures. The additional space enables Mountain Radiance to accommodate its growing menu of services, which includes hormone replacement therapy, Sculptra, and their signature Radiance Facial treatment.

Beyond aesthetic treatments, the facility offers comprehensive skincare products and personalized treatment plans developed under physician supervision. The expanded space includes enhanced consultation areas where patients can discuss treatment options and develop customized care plans tailored to their specific skin concerns and aesthetic goals.

The new Suite 101 entrance provides improved accessibility and a more welcoming arrival experience for patients. The redesigned flow of the expanded facility allows for better separation between different treatment areas, enhancing both efficiency and patient comfort throughout their visit.

Mountain Radiance Medical Spa specializes in physician-supervised aesthetic and wellness treatments, combining medical expertise with advanced technology to deliver safe, effective results. The practice emphasizes the importance of medical oversight in aesthetic treatments, ensuring that all procedures are performed according to the highest safety standards while achieving optimal patient outcomes.
