Mansfield Cosmetic Surgery Center Provides Physician-Performed Cosmetic Surgery in Mansfield, Texas

September 09, 2026

Mansfield, Texas - September 09, 2026 -
Mansfield Cosmetic Surgery Center, a plastic surgery center located in Mansfield, Texas, provides surgical and non-surgical cosmetic procedures to patients throughout Mansfield, Arlington, Fort Worth, and Midlothian. The practice is led by Dr. Michael L. Thornton of Mansfield Cosmetic Surgery Center, a double board-certified cosmetic surgeon who has performed cosmetic surgery in Mansfield since 2008. Patients from Arlington, Texas, travel to the Mansfield location for both surgical procedures and medical spa treatments.

Dr. Thornton is a double board-certified, fellowship-trained cosmetic surgeon and Diplomate of the American Board of Cosmetic Surgery. His surgical practice spans facial plastic surgery, breast enhancement, body contouring and liposuction, post-bariatric and after weight loss surgery, and a range of aesthetic medical spa services. Dr. Thornton personally conducts every consultation and follow-up visit himself and does not delegate those visits to physician assistants, nurse practitioners, or patient coordinators.

The practice's location in Mansfield reduces travel time for patients from Arlington seeking cosmetic surgery. Procedures requested by patients from Arlington include the Mommy Makeover, tummy tuck

(abdominoplasty), breast augmentation, and liposuction. The Mommy Makeover is a combination procedure that pairs breast augmentation, breast lift (mastopexy), or breast reduction with an abdominoplasty in a single surgical session.

Patients from Arlington seeking facial procedures have access to face and neck lift surgery, eyelid lift (blepharoplasty), brow lifts, facial fat grafting, and submental liposuction at the Mansfield practice. These procedures address laxity and volume loss in the face and neck, and each treatment plan is based on the individual patient's anatomy and stated goals. For patients interested in less invasive options, the center's medical spa offers neurotoxin injections, dermal fillers, RF microneedling, CO2 laser resurfacing, laser tattoo removal, and IPL photofacials. Dr. Thornton personally performs all Botox and dermal filler injections.

All surgeries requiring general anesthesia are performed at Baylor Scott & White Surgicare at Mansfield, a JCAHO-accredited and AAAHC-certified outpatient surgical facility. Each surgery is monitored by board-certified anesthesiologists and trained anesthesia providers. Dr. Thornton holds the ABCS Cosmetic Surgery Patient Safety Certification, and patients from Arlington undergoing surgery through the practice are treated at that Mansfield facility.

Dr. Thornton has served as an oral board examiner for the American Board of Cosmetic Surgery and is a former member of the ABCS Board of Trustees. He is a Fellow of the American College of Osteopathic Surgeons and a Fellow of the American Academy of Cosmetic Surgery, and he serves as president of the Texas Cosmetic Surgery Society.

Cosmetic breast surgery is available to patients from Arlington at the Mansfield practice. Procedures include breast augmentation with saline or silicone implants, breast lift (mastopexy), breast reduction, and breast implant revision or removal. Gynecomastia surgery, which reduces excess male breast tissue, is also performed at Mansfield Cosmetic Surgery Center.

The medical spa housed within Mansfield Cosmetic Surgery Center provides non-surgical skin treatments to patients from Mansfield and Arlington, including both first-time aesthetic patients and those maintaining surgical results. Led by Licensed Medical Esthetician Chelsea Jarboe-Adams and overseen by Dr. Thornton, the medical spa offers the HydraFacial Syndeo, PicoSure laser tattoo removal and skin revitalization, Cutera Secret PRO RF microneedling with CO2 resurfacing, and Cynosure ICON IPL photofacials. These treatments address sun damage and discoloration and are selected according to each patient's skin type.

The consultation process at Mansfield Cosmetic Surgery Center begins with Dr. Thornton reviewing each patient's medical history, performing a physical examination, and recommending procedures based on the patient's stated goals, health status, and available recovery time. The process is structured to support informed decision-making and to establish expectations for outcomes and recovery, which vary from patient

to patient. The physician who performs the surgery also manages the aftercare.

After weight loss body contouring is performed at the Mansfield location for patients from Arlington and the surrounding area. Dr. Thornton performs excess skin removal procedures including arm lifts (brachioplasty), lower body gluteoplasty, back lifts, breast lifts (mastopexy) and breast reductions, and several forms of abdominoplasty following significant weight loss. These surgeries are performed for patients who have lost substantial weight through bariatric surgery or lifestyle changes.

Mansfield Cosmetic Surgery Center is located at 550 N Walnut Creek Dr, Suite 120, Mansfield, TX 76063, and serves patients throughout Mansfield, Arlington, Fort Worth, and Midlothian. The practice can be reached by telephone at (817) 477-9000. Consultations for cosmetic surgery and medical spa treatments are scheduled at the Mansfield office.

Mansfield Cosmetic Surgery Center continues to provide cosmetic surgery and medical spa services to patients in Mansfield, Arlington, and the surrounding Dallas-Fort Worth metroplex.
