Trinity Hauling Addresses Growing Demand for Dumpster Rental Services in Anderson, SC

May 12, 2026

ANDERSON, SC - May 12, 2026 -
Trinity Hauling, a locally-owned waste management company based in Anderson, South Carolina, reports increased demand for roll-off dumpster rentals as the region experiences significant growth in home renovations and property cleanups along the Interstate 85 corridor. The company has expanded its same-day delivery capabilities to meet the surge in requests from homeowners and contractors throughout Anderson County.

The population growth along the I-85 corridor has created unprecedented demand for reliable waste management services, particularly following recent storm events that have left many properties requiring extensive debris removal. As a local Anderson-based operation rather than a franchise, Trinity Hauling has positioned itself to provide rapid response times when timely service has become increasingly difficult to secure in the region.

"The growth we're seeing in Anderson County has created unique challenges for property owners trying to manage renovation and cleanup projects," said Chuck Nubern, spokesperson for Trinity Hauling. "While many waste management providers are overwhelmed or operating with extended wait times, our local team

can deliver dumpsters the same day in most cases, which helps keep projects moving forward without costly delays."

The company's dumpster rental service in Anderson SC includes residential cleanouts, commercial waste removal, and construction debris management. Trinity Hauling offers 16-yard roll-off dumpsters with flexible rental periods starting at one day, with the option to extend as needed. The company also provides a swap-out service that allows customers to exchange full dumpsters for empty ones during larger projects, eliminating the need for oversized containers that may go partially unused.

Beyond standard waste removal, the company has developed specialized services for the diverse needs of Anderson County residents and businesses. These include foreclosure cleanouts, appliance and furniture removal, electronic waste disposal, and yard waste management. The company serves Anderson and surrounding communities including Clemson, Pendleton, Easley, Williamston, Pelzer, Belton, and Townville.

"Our focus remains on providing Anderson County with dependable waste management solutions that adapt to each customer's specific timeline and budget," added Nubern. "Whether someone is clearing storm debris, renovating their home, or managing a construction site, we ensure they have the right size dumpster delivered when they need it."

The increased demand for dumpster rentals reflects broader economic trends in the region, where residential and commercial development continues to accelerate. Construction permits in Anderson County have risen steadily, and the combination of new development and property improvements has created sustained demand for professional waste management services.

Trinity Hauling maintains a commitment to environmental responsibility through its zero waste initiatives, ensuring that recyclable materials are properly processed rather than sent to landfills. The company sorts and diverts materials including metal, wood, and certain construction materials to appropriate recycling facilities whenever possible.

Established as an Anderson-based operation, Trinity Hauling specializes in providing comprehensive waste management solutions for residential, commercial, and industrial clients throughout Anderson County and the surrounding South Carolina communities.
