

822 Heat & Air Expands Affordable AC Service and Repair Capabilities for Commercial Clients

June 29, 2026

Benbrook, TX - June 29, 2026 -
822 Heat & Air, a licensed HVAC contractor serving the greater Dallas-Fort Worth metroplex, announces the expansion of its commercial air conditioning installation and repair services to meet growing demand from businesses throughout North Texas.

The expansion comes as commercial property owners increasingly seek reliable HVAC partners capable of handling both routine maintenance and complex system installations. The company now offers comprehensive commercial HVAC solutions ranging from emergency repairs to complete system replacements for office buildings, retail spaces, and industrial facilities.

"Commercial clients need dependable HVAC services that minimize downtime and maintain comfortable environments for their employees and customers," said David, spokesperson for 822 Heat & Air. "Our expanded commercial division allows us to respond faster to service calls while providing the same professional expertise we've delivered to residential customers for years."

The enhanced commercial services include diagnostic assessments, refrigerant leak detection, electrical component repairs, compressor troubleshooting, and complete system installations. The company's technicians receive ongoing training on modern high-efficiency equipment to ensure optimal performance and energy savings for commercial clients.

For businesses experiencing cooling issues, the company provides ac fixing near Burleson and surrounding areas with same-day emergency response available. The expansion addresses common commercial HVAC challenges including systems that fail to maintain consistent temperatures, units producing unusual noises, and equipment showing signs of age-related deterioration.

The company's commercial installation process begins with detailed site assessments and upfront itemized quotes. Technicians evaluate existing ductwork, calculate cooling requirements based on square footage and usage patterns, and recommend appropriately sized systems for each facility's specific needs.

Beyond installations, 822 Heat & Air offers preventive maintenance programs designed to extend equipment lifespan and prevent unexpected breakdowns. Regular tune-ups help commercial clients avoid costly emergency repairs during peak cooling seasons when system failures can significantly impact business operations.

The expansion also introduces affordable a/c service options for budget-conscious businesses. Flexible financing programs, subject to credit approval, allow commercial clients to upgrade aging systems without substantial upfront investments.

822 Heat & Air maintains full licensing and insurance coverage as required by Texas regulations, holding license number TACLA65080C. The company's service area encompasses Burleson, Crowley, Joshua, Midlothian, Cedar Hill, Benbrook, Mansfield, Godley, Duncanville, Weatherford, and the broader DFW metroplex.

Established as a full-service HVAC contractor, 822 Heat & Air provides heating, ventilation, and air conditioning services for both commercial and residential properties. The company specializes in system installations, repairs, ductwork services, and preventive maintenance programs. With trained technicians experienced in modern high-efficiency equipment, the company focuses on delivering energy-efficient solutions that maintain comfortable indoor environments year-round.
