

SportsFit Introduces Well Received Patient Referral Bonus Program

November 16, 2015

November 16, 2015 - PRESSADVANTAGE -

Santa Monica, CA based fitness company, SportsFit Physical Therapy & Fitness, has initiated a Patient Referral Bonus Program. Through the program those who refer a patient will be provided with the choice of a special treatment. Treatments include a one-hour massage session, a yoga therapy session, a performance enhancement session, or a private Pilates session.

The company has decided to go ahead with this promotional campaign, which can be seen through their social media account at Facebook, due to the high number of patients who are referred to the clinic. SportsFit has stated that they take these referrals as true compliments, and to thank all of the loyal patrons of their therapy and fitness business, they want to give back through these gifts of service. The company describes themselves as follows: "SportsFit Physical Therapy & Fitness is the premier orthopedic and sports physical therapy clinic in Santa Monica. SportsFit offers a multidisciplinary approach to therapy by providing the most effective and practical physical therapy interventions, including orthopedic and sports rehabilitation, Pilates, Acupuncture, therapeutic yoga, therapeutic massage, and performance enhancement programs for athletes and the active patient population."

The company is already a well-known source of physical therapy within the community, having won the 2015 Patients' Choice Award for Santa Monica Physical Therapist. With this program the company hopes to continue building their list of patients, and in doing so reach out to and help more people throughout the city who require this type of therapy and fitness aid. This is why each new referral made by any current patient is equal to one bonus gift from SportsFit Physical Therapy & Fitness. The company is placing absolutely no limits on this bonus, meaning that current clients can earn unlimited special service gifts by continuing to refer friends, family, and even strangers.

For more information on the new referral program and SportsFit Physical Therapy & Fitness, the company invites new and current patients to visit them online through their Website Home Page. Visiting the site regularly and following the team through Facebook, is also reported as way that patients can become notified about additional promotions and discounts on upcoming services.
